And students of color or those experiencing poverty are overrepresented in this group.

Why are geometry tests so hard? Children are required to use their spatial and logical skills instead of the analytical skills they were accustomed to using in Algebra. And since geometry is never taught the way it should, students see it as another analytical problem they have to solve, rather than visualizing the actual geometric figures.

What grade is most commonly failed? The seemingly inexplicable 9th-grade failures have been frequent, and they often foreshadow delayed graduation or students dropping out of school.

What grade does the average person take geometry?

What is the fastest way to learn geometry? Do lots of practice problems. As with any math course, time spent practicing is the best way to improve your Geometry skills.
