**What are some good questions about The Great Gatsby?**

**What are some questions for Chapter 1 in The Great Gatsby?**

**What are some unanswered questions in The Great Gatsby?** There are so many tantalising questions that lie unanswered. Some must remain so — for example, would Tom ever have sold Wilson a car? Who was Owl-eyes? Whose teeth are on Wolfshiem's cuffs?

**What are 5 rhetorical questions?**

**What was F. Scott Fitzgerald's most effective rhetorical device in The Great Gatsby?** Fitzgerald uses rhetorical devices such as alliteration and repetition to contribute to the text's evocative mood.

**What are the essential questions of The Great Gatsby?** Essential Questions and Skills: How is Nick “the perfect narrator?” How is this novel a critical commentary of American society? How does Fitzgerald use symbolism and irony in the novel? What are the effects of the symbolism and irony? How does the novel's structure affect the unwinding of the plot?

**What are the three main points of Great Gatsby?** A perennial presence on the AP Lit Reading List, the themes at the heart of F. Scott Fitzgerald's *The Great Gatsby* – greed, love, violence, and the “American Dream” – are as compelling as when the novel was published in 1925.

**What is the biggest lesson in The Great Gatsby?** The moral of *The Great Gatsby* is that the American Dream is ultimately unattainable. Jay Gatsby had attained great wealth and status as a socialite; however, Gatsby's dream was to have a future with his one true love, Daisy.

**What does the green light symbolize in The Great Gatsby?** The Green Light is significant for several reasons. First, it symbolizes Gatsby's undying love for Daisy as he reaches toward the light on her dock. However, it becomes symbolic of Gatsby's inability to fully reach the American dream as his life unravels.

**What are the symbols in The Great Gatsby?** Some of the most important symbols in “*The Great Gatsby*” are: the green light, the Valley of Ashes, the eyes of Dr. T.J. Eckleburg, Gatsby's unnecessarily large home, and the extravagant parties that took place.

**Why did Daisy not choose Gatsby?** Although Daisy may have loved Gatsby once, she does not love him more than the wealth, status, and freedom that she has with Tom.

**What is the central question in The Great Gatsby?** In *The Great Gatsby* by F. Scott Fitzgerald, the central question would probably reflect around Jay Gatsby's wealth and his dream girl, Daisy. The central question could probably be why does these things matter greatly to himself.

**What is the biggest problem in The Great Gatsby?** The main conflict in *The Great Gatsby* is a series of love triangles. As many of the characters involve themselves in extramarital affairs, some of them end up dead while others stay together. In the end, Tom and Daisy, both of whom have been openly unfaithful, are seen walking together still married.

**What are the controversial topics in The Great Gatsby?** *The Great Gatsby* was challenged and banned for a few reasons: sex, violence, adultery, and language.

The affair between Daisy and Gatsby along with Nick's language regarding Jordan Baker make up most of the sex and adultery reasoning behind the challenging and banning of the book.

**What rhetorical choices does *The Great Gatsby* use?** The rhetorical devices that Fitzgerald uses in the novel are alliteration, allusion, epizeuxis, hyperbole, imagery, metaphor and simile, oxymoron, and personification.

**What is the central question in *The Great Gatsby*?** In *The Great Gatsby* by F. Scott Fitzgerald, the central question would probably reflect around Jay Gatsby's wealth and his dream girl, Daisy. The central question could probably be why does these things matter greatly to himself.

**Why does Brutus use rhetorical questions?** Brutus first reminds the crowd of his reputation as a virtuous man, saying, "Believe me / for mine honor" (lines 16–17), to suggest that his actions, too, were honorable. Then, by asking a series of rhetorical questions in lines 23–26 and lines 30–35, Brutus implies that Caesar would have become a tyrant had he lived.

**What are the essential questions of *The Great Gatsby*?** Essential Questions and Skills: How is Nick "the perfect narrator?" How is this novel a critical commentary of American society? How does Fitzgerald use symbolism and irony in the novel? What are the effects of the symbolism and irony? How does the novel's structure affect the unwinding of the plot?

**What is the hardest problem to solve in physics?** The unification of quantum mechanics and general relativity: Quantum mechanics and general relativity are two of the most successful theories in physics, but they are incompatible with each other. **What is the hardest thing to study in physics?** Quantum Physics Courses  
Quantum Physics requires mathematical, computer science, and quantum lingo skills. It is about studying atoms and particles at the very basic level and applying the theories in the real world. Of all scientific courses, Quantum Physics has been credited as the toughest course in the world.

**What is the hardest physics class in high school?** Consequently, both Physics C courses (Mechanics as well as Electricity & Magnetism) are regarded as two of the hardest AP classes that you can take in high school. You'll cover topics like electrostatics, conductors, and electromagnetism over the course of five units.

**Is physics harder than chemistry?** Some people find Physics easier because it involves mainly mathematical concepts and logic, while others prefer Chemistry due to its mix of concepts, memorization, and hands-on lab work.

**At what grade is physics taught?** In high school, physics is usually taught in 11th grade, although some students may take the course in 12th grade or as early as 10th grade depending on their academic level. Students will learn about the basic principles that govern the physical world.

**What are the 7 biggest unanswered questions in physics?**

**Why are physics problems so hard?** Answer: Physics demands problem-solving skills that can be developed only with practice. It also involves theoretical concepts, mathematical calculations and laboratory experiments that adds to the challenging

concepts.

**What is the hardest physics equation to solve?** Answer to the question (What is the hardest physics equation?): \* The hardest general equation to arrive at is perhaps the relativistic mass-energy equation  $E = \{m_0\} c^2 / \sqrt{1 - \{v^2\}/\{c^2\}}$  . \* The hardest specific equations to solve are perhaps the nonlinear Schrodinger equations or nonlinear solito...

**How to solve physics problems quickly?**

**What is the 1st thing one must do with every physics problem?** First, identify the givens, or knowns, in the problem. Next, identify the unknowns in the problem and which specific unknown needs to be solved for. Then, identify the proper equations and substitute the givens from the problem into the proper equation.

**What are the 5 steps of problem-solving in physics?** As with so many other learning activities, it is useful to break a problem solving strategy into major and minor steps. The strategy we would like you to learn has five major steps: Focus the Problem, Physics Description, Plan a Solution, Execute the Plan, and Evaluate the Solution.

**Which chapter of physics is toughest?** The Toughest Chapters in Physics for JEE are Heat and Thermodynamics, Mechanics, Electrostatics and Magnetism, Current Electricity, Optics, Modern Physics, Electromagnetic Induction, etc. Candidates must follow a proper preparation strategy to get a good score in the Physics section of JEE exam.

**Which is most hardest topic in physics?**

**What are 5 questions science can't answer?** What happens to us after we die? How did so much life appear on our planet when others seem devoid of any species at all? Who, if anyone, pulls the strings of our universe? Is it some all-powerful god in control or are there physical and mathematical principles driving the engine of our existence?

Most sources like to cite the 1970 class, which began with 75 students and — between the advanced nature of the material and the time-constraints under which students had to work — ended with barely 20.

**Which physics is the easiest?** Algebra-based, often labelled as "Physics I" or "General Physics," is typically the easier of the two because it doesn't require a strong math background beyond algebra and trigonometry. It's commonly taken by students in the life sciences or those who need a general science credit.

**What is the most famous equation in physics?** The equation  $E = Mc^2$  is perhaps the most famous equation of twentieth-century physics. It is a statement that mass and energy are two forms of the same thing, and that one can be converted into the other (ibid., p.
