**What is a refractory inspector?** Refractory inspection is the process of closely examining the heat-resistant lining in industrial equipment to ensure it is in good condition and functioning correctly. Thermography is a proven and accepted method for locating damaged and missing refractory material during this inspection.

**What do API numbers mean?** The API (American Petroleum Institute) number is a unique number assigned to every oil and gas well. It is used by agencies to identify

and track oil and gas wells. Every oil and gas well permitted in West Virginia since 1929 has been issued an API number.

**What does API grade mean?** The service rating of passenger car and commercial automotive motor oils is classified by the American Petroleum Institute (API). The program certifies that engine oil meets certain Original Equipment Manufacturer (OEM) quality and performance standards.

**What is section 936?** The principal such provision was Section 936 of the federal tax code, which allowed subsidiaries of U.S. firms operating in Puerto Rico to pay no federal taxes on their Puerto Rican profits, even if those profits were returned to the United States (i.e., to the parent company in the states).

**What material is 936?** Copper alloy 936 or Modified SAE 64 has advantages over other leaded bronzes such as: bearings run cooler, less tool wear, corrosion-resistant, better survival of interruptions in lubrication, better machinability, and resists pounding over other bearing materials.

**What is the ISO number for a weld procedure specification?** ISO 15610:2023 - Specification and qualification of welding procedures for metallic materials — Qualification based on tested welding consumables.

**How much does an API 653 inspector earn in USA?** While ZipRecruiter is seeing annual salaries as high as \$99,000 and as low as \$24,500, the majority of Api 653 Inspector salaries currently range between \$38,500 (25th percentile) to \$63,500 (75th percentile) with top earners (90th percentile) making \$92,000 annually across the United States.

**How long does API certification last?** Recertification Overview API 510 Pressure Vessel inspectors need to apply for recertification every three (3) years. Apply online in the ICP Portal. You may apply for recertification 90 days prior to the certification expiration date, and for a 90-day grace period after. Late fees apply after the expiration date.

**What does an API tester do?** While developers tend to test only the basic functionality they are working on, testers are in charge of testing functionality, performance and security of APIs, discovering how all components work together

from end to end.

**How much does an API cost?** The cost of building an API can vary depending on the complexity of the project, but it typically ranges from \$10,000 to \$50,000. There are a number of factors that can affect the cost of API development, including the number of endpoints, the data volume, and the security requirements.

**What does API stand for?** What does API stand for? API stands for Application Programming Interface. In the context of APIs, the word Application refers to any software with a distinct function. Interface can be thought of as a contract of service between two applications.

**What is an example of an API?** The Google Maps API and Twitter API may be among the most widely used API examples, but most software-as-a-service (SaaS) providers offer APIs that let developers write code that posts data to and retrieves data from the provider's site as well.

**Are API keys safe?** Security of API keys API keys are generally not considered secure; they are typically accessible to clients, making it easy for someone to steal an API key. Once the key is stolen, it has no expiration, so it may be used indefinitely, unless the project owner revokes or regenerates the key.

**How much does it cost to get an API key?** API Keys is free of charge. If you use Cloud Endpoints to manage your API, you might incur charges at high traffic volumes. For more information, see Endpoints pricing.

**What is an example of an API key?** String. The API key string is an encrypted string, for example, AlzaSyDaGmWka4JsXZ-HjGw7ISLn\_3namBGewQe . When you use an API key to authenticate, you always use the key's string.
