Stephen King on Writing a Memoir of the Craft

Legendary horror maestro Stephen King recently delved into the realm of non-fiction with his memoir, "On Writing: A Memoir of the Craft." In this revealing book, King shares his insights, experiences, and invaluable advice for aspiring writers.

Q: What inspired you to write a memoir about writing?

A: "I've always been a teacher, whether in the classroom or through my books. I wanted to share what I've learned over the years with young writers who are just starting out."

Q: What are some key lessons you learned from your own writing journey?

A: "First, writing is hard work. There's no getting around it. Embrace the discipline and be prepared to put in the hours. Second, read voraciously. The more you read, the better writer you'll become. Third, find your voice. Don't try to imitate others; write what comes naturally to you."

Q: What are the biggest challenges aspiring writers face?

A: "Fear is a major obstacle. The fear of failure, the fear of rejection, the fear of not being good enough. But it's important to push past that fear and keep writing. Another challenge is finding the time to write. Make writing a priority in your life and

schedule it in as if it were a doctor's appointment."

Q: What advice would you give to writers who want to improve their craft?

A: "Write every day, even if it's just a few words. Keep a journal to record your ideas and observations. Practice writing different genres and styles to expand your skills. And most importantly, never give up. Writing is a marathon, not a sprint."

Q: What do you hope readers will take away from your memoir?

A: "I hope they'll be inspired to believe in themselves and their abilities as writers. I also hope they'll understand that writing is a lifelong journey filled with both challenges and triumphs. And that it's a journey worth taking."

How to check if a journal is predatory or not? You should always check whether a journal you want to publish in is telling the truth. If a journal is indexed by JCR or/and DOAJ, that is usually a very good indicator that the journal is not predatory. Searching DOAJ database is quite easy – you just need to enter the journal's name, ISSN or the journal's publisher.

Is Dove Press a predatory publisher? In 2022, a study re-analyzing the predatory publishers on Beall's list found that Dove Medical Press was among the "most reputable" of 18 publishers previously labelled as predatory, which could have marked a "transition into a reputable, open access journal".

Is Beall's List still active? Since Beall's List closed, similar lists have been started by others, including CSIR-Structural Engineering Research Centre, and an anonymous group at Stop Predatory Journals.

Is Elsevier a predatory publisher? They're generally legitimate. The negative reviews and boycotts aren't about the quality of the journal, but are because of Elsevier's alleged high prices (see The Cost of Knowledge). Elsevier publishes some of the best journals in some fields, e.g. The Lancet and Cell.

How do you know if a publisher is credible?

What is the alternative to Beall's List? Beall's list, the vanished blacklist left the authors in the developing countries without support and guides. Kscien list is a new attempt to flag the predators and replace the Beall's list.

Is aim press predatory? AIMS is not a predatory press and its journals are not predatory.

What is the best predatory journal? European Science Review ranks first in the list of predatory journals in which 20% of the predatory research papers were published, followed by European Applied Sciences (5%) and Austrian Journal of Technical and Natural Sciences (4%). ...

How can you tell if a publisher is predatory?

Is Frontiers a predatory journal? Yes, Frontiers is a predatory journal. Regardless, they are a huge producer of the scientific articles that enter the literature: 3rd most cited and 6th largest publisher! That's a lot of papers that go through the same "peer review" process that let this through.

Why is Elsevier controversial? The Cost of Knowledge is a protest by academics against the business practices of academic journal publisher Elsevier. Among the reasons for the protests were a call for lower prices for journals and to promote increased open access to information.

How many predatory journals are there? That is roughly the same number of legitimate, open-access academic journals – available to readers without charge and archived in a library supported by a government or academic institution – published

around the same time. In 2021, another estimate said there were 15,000 predatory journals.

How to avoid predatory publishers?

Is Beall's list reliable? The Jeffrey Beall's list is questionable at the least and seems to target open access publishers like Academic Journals. While there was some wisdom to the intentions of the list, the lack of clear criteria for inclusion or exclusion from the list were however, questionable.

Is MDPI predatory? Some journals published by MDPI have also been noted by the Chinese Academy of Sciences and Norwegian Scientific Index for lack of rigor and possible predatory practices.

Is Cureus a predatory journal? Cureus is not in the predatory journals Bells list.

Are all paid journals predatory? No, there are other types. For example, predatory journals may steal intellectual property through deception, engage in fraudulent or fake peer review, or list respected researchers on its editorial board without their knowledge or consent.

How to check if a journal is legit?

How to identify a predatory journal pretend to be legitimate?

What are the indicators of predatory journals? Common red flags of predatory journals: In spite of peer review claims, evidence of very little peer review or none at all. A clearly stated peer review policy may also be lacking. False claims of indexing in research databases.

How to differentiate between the reliable journals and predatory journals?

Predatory journals rely on a business model based on APCs or publication fees, as do many reputable open access journals. However, a serious open access journal will usually charge a fee only once they have decided to accept the article based on the results of the peer review, and not in advance.
