What is the journal impact factor for anesthesia and intensive care?

Is Anaesthesia journal peer reviewed? Anaesthesia Reports is an official journal of the Association of Anaesthetists. It is international in scope and publishes original, peer-reviewed case reports, media content, and associated papers on all aspects of anaesthesia, peri-operative medicine, intensive care and pain therapy.

What is anaesthesia and critical care? Critical care anesthesiologists care for patients who have had recent major surgery or who suffer from the effects of severe infections or trauma. "I would describe them as all the varied types of surgical and postoperative patients," says Dr.

What are the pillars of Anaesthesia? ? General anaesthesia often comprises a triad of hypnosis, analgesia and muscle relaxation. ? General anaesthesia can be divided into three stages: induction, maintenance and emergence.

What is the highest Impact Factor for a medical journal?

What drugs do anesthesiologists use? Propofol, etomidate, and ketamine are the intravenous (IV) sedative-hypnotic agents commonly used to induce general anesthesia (table 1), while adjuvant agents (eg, opioids, lidocaine, midazolam, and volatile anesthetics) are often used to supplement the effects of the primary sedative-hypnotic induction agent (table 2 ...

What is the rank of journal of Clinical anesthesia?

What is the acceptance rate for the Journal of Anesthesia? The Journal of Anesthesia (JA) welcomes case reports that show unique cases in perioperative medicine, intensive care, emergency medicine, and pain management. However, JA rarely accepts case reports for publication; their acceptance rate may be less than 5%.

What is the most peer-reviewed medical journal? The New England Journal of Medicine (NEJM) is recognized as the world's leading medical journal and website.

What is the most common critical incident in anesthesia? [14] In our audit, cardiovascular causes were the most frequent critical incidents due to hypotension and bradycardia.

Can CRNA work in ICU? Work as a registered nurse for at least one year in an intensive care unit (ICU). Most RNs who become CRNAs work for closer to three years in this setting. Attend and graduate from an accredited nurse anesthesia program, which results in a doctoral degree. These programs are three years in length.

Do all surgery patients go to ICU? In some cases, you may be moved to the intensive care unit (ICU) for further, close monitoring. This is most often needed if you require mechanical ventilation, or if you are recovering from heart attacks or major surgery. It's also needed if you go into shock, or if you develop kidney failure.

What are the 6 A's of anesthesia? Contemporary general anesthesia focusses on what may be referred to as the 6 A's. These are, in random order, anxiolysis, areflexia, autonomic areflexia, analgesia, amnesia and anesthesia.

What are the 4 stages of anesthesia? There are four stages of general anesthesia, namely: analgesia - stage 1, delirium - stage 2, surgical anesthesia - stage 3 and respiratory arrest - stage 4. As the patient is increasingly affected by the anesthetic his anesthesia is said to become 'deeper'.

What are the 3 phases of anaesthesia recovery? The recovery from major surgery can be divided into three phases: (1) an immediate, or post anesthetic, phase; (2) an intermediate phase, encompassing the hospitalization period; and (3) a convalescent phase.

Is 7 a good impact factor? The perception of an impact factor (IF) being considered "high" can vary depending on the field of study. Generally, an impact factor of more than 7 is considered high. However, different disciplines may have different norms and citation practices, which influence these numbers and rankings.

What is the most prestigious journal?

What is a Tier 1 journal?

What is the most abused drug by anesthesiologists? Opioids remain the most commonly misused medication by ACPs, but propofol misuse is also common and increasing in incidence. Anesthesia residents who develop SUD have a mortality rate of 7.9% (95% CI, 3.1 to 20.5).

Why did I pee while under anesthesia? A patient who's been anesthetized with general anesthesia isn't able to control their urination. Because of this, the surgical team will usually place a Foley catheter before performing the procedure. This ensures that the bladder stays empty and the operation is clean and sterile.

Does your heart stop under general anesthesia? If you get too much anesthesia, your brain will stop telling your heart and lungs to work. It's rare with modern technology, but it can be fatal.

What is the Impact Factor of anesthesiology journal?

What is the Impact Factor of intensive care medicine journals?

What is the Impact Factor of the Open journal of Anesthesiology? There are 1481 citations for articles published in the journal OJAnes as of July 2022 based on the statistics from Google Scholar.
