Twisted Tests: A Discussion with Laurie Halse Anderson

Laurie Halse Anderson, renowned author of the award-winning novel "Speak," has once again delved into the complexities of teenage life with her latest work, "Twisted." The book explores the murky world of social media and its potential for harm, sparking a timely and vital conversation about the digital landscape our children navigate. This Q&A provides insights into Anderson's motivations and the profound themes she explores in "Twisted."

Question: What inspired you to write "Twisted"?

Answer: I was intrigued by the idea of 'threadjacking,' where someone takes over an existing online conversation and redirects it towards a destructive or dangerous end. I wanted to explore the potential consequences of such behavior, particularly for young people who may be more vulnerable to its allure.

Question: The book raises important questions about social media usage. What do you hope readers will gain from it?

Answer: I hope it encourages them to question the role of social media in their lives, to consider its potential for both good and harm. It's important to navigate this realm with caution and awareness, and I hope the book provides a starting point for those conversations.

Question: "Twisted" also delves into the topics of revenge and humiliation. How do you balance the need to address these issues with protecting young readers?

Answer: It's a delicate balance, for sure. I strived to present the consequences of such behavior without sensationalizing them. I believe it's essential for young people to understand the real-world impact of their actions, both online and offline.

Question: How do you approach the portrayal of teenage characters in your work?

Answer: I draw from my own experiences and observations of young people. I believe in their resilience and strength, but I also recognize the challenges they face. I aim to create characters who are both relatable and complex, allowing readers to connect with their struggles and aspirations.

Question: What message do you hope to convey to readers with "Twisted"?

Answer: Ultimately, I want to encourage empathy, resilience, and critical thinking. It's crucial for our children to be aware of the potential dangers of social media, but it's equally important to empower them with the knowledge and skills to navigate this digital landscape safely and responsibly.

DRUG QUIZ QUESTION AND ANSWER

Kansas, Nebraska, Wyoming, Idaho, Oregon, and Washington.

What did pioneers travel in to get to Oregon? Pioneer families carried all of their possessions in wagons that were only about ten feet long and four feet wide. They were called "prairie schooners" because the canvas cover looked like a ship's sail. Most wagons were pulled by oxen.

What motivated settlers to travel to Oregon? Free land in Oregon and the possibility of finding gold in California lured them westward. At the same time, eastern churches wanted to teach American Indians of the Oregon Country their European ideas of "civilization." Many simply hoped for a chance to start a new life.

Did the Oregon Trail go through Twin Falls Idaho? From the present site of Pocatello the trail proceeded almost due west on the south side of the Snake River for about 180 miles (290 km). On this route they passed Cauldron Linn rapids, Shoshone Falls, two falls near the present city of Twin Falls, Idaho, and Upper Salmon Falls on the Snake River.

What was the disease most feared by travelers on the Oregon Trail? Cholera was the main scourge of the trail. It could attack a perfectly healthy person after breakfast and he would be in his grave by noon. However, many would linger in misery for weeks in the bouncy wagons.

Does any of the Oregon trails still exist? Historians estimate that about 300 of the original 2,000 miles (480 of 3,200 km) of the Oregon Trail remain untouched. The rest of it has been lost to time or development—in many places, roads and highways were built directly over the popular route, such as Oregon's stretch of U.S. 26 along the Barlow Road route.

How did people go to the bathroom on a wagon train? They dug holes in the ground for toilets. Many emigrants probably didn't wash their hands afterward. Rain washed the contents of the holes into the streams or rivers.

What time did pioneers go to bed? Pioneers typically went to sleep at dusk since, without light, not much could be accomplished. Candles and lanterns were expensive and not to be wasted.

What was the main cause of death on the Oregon Trail? Death was an ever-present companion. It is estimated that as many as 1 in 10 emigrants died on the trail—between 20,000 and 30,000 people. The majority of deaths occurred because of diseases caused by poor sanitation. Cholera and typhoid fever were the biggest killers on the trail.

What was Oregon called before it became a state? — Before Oregon was the 33rd state admitted to the United States in 1859, it was known as the Oregon Territory, and before that, the Oregon Country.

Who were the first white settlers in Oregon? John Jacob Astor, as the head of the Pacific Fur Company, began European American settlement of the Oregon country with the establishment of a trading post at Astoria in 1811.

Why didn't most pioneers ride in their wagons? Rough roads and wagons without springs made for a very bumpy ride, and wagons were filled with supplies which left little room for passengers. Generally, travelers only rode in wagons when too ill or tired to walk, and slept most nights in tents or bedrolls outside the wagon.

Why is Twin Falls Idaho called the Magic Valley? They're located in the region known as the Magic Valley, named for the early settlers who “magically” transformed this arid, largely uninhabitable land into a lush, agricultural paradise by irrigating their fields with water from the nearby Snake River.

Why are Twin Falls called Twin Falls? Twin Falls, on the Snake River a little over five miles upstream from the eponymous city (and about two and a half miles upstream from Shoshone Falls), consists of similar-sized falls in chutes on either side of a stubby basalt pillar. Hence the name was particularly appropriate.

How hard is it to hike Twin Falls? Generally considered a moderately challenging route, it takes an average of 53 min to complete. This is a very popular area for hiking, so you'll likely encounter other people while exploring. The trail is open year-round and is beautiful to visit anytime.

What was the deadliest thing on the Oregon Trail? Nearly one in ten who set off on the Oregon Trail did not survive. The two biggest causes of death were disease and accidents.

How many bodies are buried along the Oregon Trail? There were an estimated 300,000 pioneers that traveled the road which means approximately 15,000 were buried along the trail side. The state of Wyoming has records of those that are known. Some of the names on this list include family history and how they died.

How long did it typically take for a wagon train to travel the Oregon Trail? Between 1840 and 1860, from 300,000 to 400,000 travelers used the 2,000-mile overland route to reach Willamette Valley, Puget Sound, Utah, and California destinations. The journey took up to six months, with wagons making between ten and twenty miles per day of travel.

Do wagon ruts still exist? Heavy wagons being pulled forward by livestock dug into the ground, creating ruts. These ruts were deepened and lengthened by wagons wet from river crossings, which made the ground muddy. The ruts were maintained, and grew, by the thousands of wagons that traveled through this area. They can still be seen today.

How deep are the ruts in the Oregon Trail? The ridge's soft sandstone was no match for thousands of iron-shod wheels and hooves and quickly eroded. By the time Oregon Trail travel ended, ruts five feet deep had been chewed into the rock.

Can you still see graves along the Oregon Trail? A number of these emigrant graves can still be found along the trails and through the dedicated research of some OCTA volunteers, the history of the deceased has been reconstructed and markers have been placed.

What was the main cause of death to pioneers on the trail? Death on the Trail Death was an ever-present companion. It is estimated that as many as 1 in 10 emigrants died on the trail—between 20,000 and 30,000 people. The majority of deaths occurred because of diseases caused by poor sanitation.
