The Tulip Touch: A Masterpiece of Anne Fine

Q: What is "The Tulip Touch" about? A: "The Tulip Touch" is a captivating novel by Anne Fine that delves into the life of Millie, a young girl who discovers a magical gift. When she touches tulips, they come to life, revealing their secrets and emotions.

Q: How does Millie's gift affect her life? A: Millie's gift transforms her world. She becomes connected to nature and finds solace in her own imagination. However, it also brings challenges, as her secrets are threatened by a determined teacher who seeks to exploit her ability.

Q: What are the main themes of the novel? A: "The Tulip Touch" explores themes of friendship, creativity, and the power of imagination. It also touches on the importance of accepting one's uniqueness and finding ways to express it.

Q: What makes Anne Fine's writing so compelling? A: Fine has a gift for creating believable characters and heartwarming stories. Her writing is accessible and engaging, capturing the imagination of readers of all ages. She skillfully weaves together themes and emotions to create a memorable and meaningful experience.

Q: What age group is "The Tulip Touch"??? A: "The Tulip Touch" is a middle-grade novel suitable for children aged 9 to 12. However, its themes and characters can resonate with older readers as well. It is an excellent choice for anyone who enjoys stories about friendship, nature, and the power of imagination.

Winningham and Preusser Critical Thinking Cases in Nursing: Answer Key

Case 1: The Patient with Abdominal Pain

Question: A patient presents to the emergency department with severe abdominal pain. The nurse completes a comprehensive assessment and reports the findings to the physician. The physician orders a computed tomography (CT) scan to rule out a perforated viscus. While waiting for the results of the CT scan, the nurse observes that the patient's pain is increasing and the patient is becoming more agitated.

Answer: The nurse should intervene by administering pain medication as ordered by the physician and monitoring the patient's vital signs and pain level. The nurse should also notify the physician of the patient's increasing pain and agitation.

Case 2: The Patient with Dyspnea

Question: A patient with a history of chronic obstructive pulmonary disease (COPD) is admitted to the hospital with dyspnea. The nurse completes an assessment and

notes that the patient is short of breath at rest and has wheezing. The physician orders a chest X-ray and arterial blood gas (ABG) analysis.

Answer: The nurse should intervene by administering oxygen as ordered by the physician and monitoring the patient's respiratory status. The nurse should also prepare the patient for the chest X-ray and ABG analysis.

Case 3: The Patient with a Wound Infection

Question: A patient with a surgical wound develops a wound infection. The nurse assesses the wound and notes that it is red, swollen, and purulent. The physician orders antibiotics and wound care.

Answer: The nurse should intervene by administering antibiotics as ordered by the physician and cleaning and dressing the wound according to the physician's instructions. The nurse should also monitor the patient's vital signs and wound site for signs of improvement or worsening.

Case 4: The Patient with a Medication Error

Question: A nurse accidentally administers an incorrect medication to a patient. The nurse realizes the error and immediately notifies the physician and the patient.

Answer: The nurse should intervene by administering the correct medication as ordered by the physician and monitoring the patient for any adverse effects. The nurse should also document the error in the patient's medical record and notify the appropriate authorities.

Case 5: The Patient with a Falls Risk

Question: A patient is admitted to the hospital with a history of falls. The nurse completes an assessment and notes that the patient has several risk factors for falls, including impaired mobility and a history of syncope.

Answer: The nurse should intervene by implementing fall precautions as ordered by the physician, such as providing the patient with an assistive device and monitoring the patient for signs of instability. The nurse should also educate the patient and family about fall prevention measures.
