How to build a strategic plan?

What does FHA look for in an appraisal? FHA appraisal and inspection checklist Must have an undamaged exterior, foundation and roof. Must have safe and reasonable property access. Must not contain loose wiring and exposed electrical systems.

What is an FHA checklist? An FHA home inspection checklist is used by HUD-approved property appraisers to thoroughly inspect the entire property. It is used to assess the exterior and interior structure of the house, electrical, plumbing, and ventilation systems if in good condition and comply with regulatory standards.

What things will fail an FHA inspection? The overall structure of the property must be in good enough condition to keep its occupants safe. This means severe structural damage, leakage, dampness, decay or termite damage can cause the property to fail inspection. In such a case, repairs must be made in order for the FHA loan to move forward.

Is it hard to pass an FHA appraisal? FHA lenders cannot lend more than the home is worth, so if the appraisal comes in below the sale price, you'll need to negotiate the price with your lender or walk away from the sale. How tough are FHA appraisals? The FHA has strict requirements for the properties it backs, but most homes pass appraisal just fine.

What are the red flags for FHA appraisals? Major structural issues that are common FHA red flags include cracked or crumbling foundations, deteriorating roofs, and water damage. Other red flags that appraisers look for include: Missing handrails. Cracked windows.

How picky are FHA inspections? What won't pass an FHA inspection? The FHA is most concerned with issues that affect the safety and livability of the property. If anything major happens that could affect the safety or health of an occupant, the appraisal is failed, and the issues need to be rectified before the mortgage can close.

What would disqualify a home from FHA financing? The FHA says that examples of such problems include but are not limited to the following: Missing handrails. Cracked or damaged exit doors that are otherwise operable. Cracked window glass.

How long after an FHA appraisal is closing? The length of time from an appraisal to closing can vary. While mortgage timelines can differ based on individual situations, some lenders estimate that this period typically takes about 30 to 45 days. If the process takes longer than that, the mortgage lender may still accept the appraisal for some time.

How often do FHA appraisals come in low? While how often home appraisals come in low can depend on market conditions, research by Fannie Mae shows that in a balanced market, around 8% of appraisals come in below the contract price.

Why would a home not pass FHA? The FHA's three requirements are that a property must be safe, secure, and structurally sound to qualify for one of their loans. Properties cannot have adverse conditions that might imperil the homeowner, and must meet proper building codes. As a buyer, these standards protect you from buying an unsafe property.

What will deny an FHA loan? Despite the lenient FHA loan requirements, it is possible to be denied. The three primary factors that can disqualify you from getting an FHA loan are a high debt-to-income ratio, poor credit, or lack of funds to cover the required down payment, monthly mortgage payments or closing costs.

Are FHA inspections more strict than conventional? An FHA appraisal can require repairs before the loan is approved. That's more strict than a conventional loan. An appraisal isn't a home inspection. It's still a good idea to get a home inspection for your own benefit.

What is the timeline for the FHA inspection? FHA Appraisal Timeline The appraiser will spend anywhere from 45 minutes to several hours evaluating a home. Once the appraisal has taken place, the report is usually complete within 7 to 10 business days. The appraisal process involves: Scheduling the appraisal appointment.

What to expect during an FHA appraisal? What to Expect During an FHA Appraisal. An FHA appraisal examines the real estate property – especially the house – for two things: whether it's worth the loan amount, and whether the house meets basic health and safety requirements. Usually, the buyer pays for the appraisal.

How likely is a low appraisal? According to a report by the National Association of Realtors (NAR), only about 10% of all real estate appraisals come in below the contract price. That means, in 90% of cases, the appraised value equals or exceeds the price agreed upon by the buyer and seller.

What would disqualify a home from FHA financing? The FHA says that examples of such problems include but are not limited to the following: Missing handrails. Cracked or damaged exit doors that are otherwise operable. Cracked window glass.

How long does an FHA appraisal take to get back? The appraiser will spend anywhere from 45 minutes to several hours evaluating a home. Once the appraisal has taken place, the report is usually complete within 7 to 10 business days.

The Elements of Graphing Data

Graphs are a powerful tool for visualizing and understanding data. They can be used to identify trends, patterns, and relationships that would not be apparent from the raw data alone. There are many different types of graphs, each with its own strengths and weaknesses. The most common type of graph is the **line graph**, which is used to plot data that changes over time or some other independent variable.

1. What are the basic elements of a graph?

The basic elements of a graph are the **x-axis**, the **y-axis**, and the **plotted points**. The x-axis is the horizontal axis and the y-axis is the vertical axis. The plotted points are the data points that are being graphed.

2. What is the difference between a scatter plot and a line graph?

A **scatter plot** is a graph that shows the relationship between two variables without connecting the data points with lines. A **line graph** is a graph that connects the data points with lines.

3. What is a trendline?

A **trendline** is a line that is drawn through the data points on a graph to show the general trend of the data. Trendlines can be linear, exponential, or polynomial.

4. What is a bar graph?

A **bar graph** is a graph that uses bars to represent the data. The height of each bar represents the value of the data point. Bar graphs are often used to compare different data sets.

5. What is a pie chart?

A **pie chart** is a graph that uses a circle to represent the data. The size of each slice of the pie represents the percentage of the data point. Pie charts are often used to show the proportions of different parts of a whole.
