**How do you stack a shipping container without a crane?** Top Loader. A top loader is a type of forklift that is specifically designed to lift shipping containers from the top and stack them in a single pile.

**Can you lift a shipping container with a forklift?** For many shipping container jobs, a heavy-duty forklift is the better option. Upper weight limit: Ensure your

forklift's upper weight limit is sufficient for the shipping container you are lifting. Fork width: You should also confirm that the fork is wide enough to reach the pockets on the container.

## **Sixth Edition Accounting 1 Syme Ireland Answer**

### **Question 1:**

What is the difference between an asset and a liability?

#### **Answer:**

An asset is an economic resource that is owned or controlled by an entity and is expected to provide future economic benefits. A liability, on the other hand, is an obligation of an entity that is expected to result in the outflow of resources in the future.

### **Question 2:**

What are the three types of business transactions?

#### **Answer:**

The three types of business transactions are revenue transactions, expense transactions, and asset/liability transactions. Revenue transactions increase the entity's equity, while expense transactions decrease the entity's equity. Asset/liability transactions may increase or decrease the entity's equity depending on the nature of the transaction.

### **Question 3:**

What is the purpose of the accounting equation?

#### **Answer:**

The accounting equation is  $\text{Assets} = \text{Liabilities} + \text{Equity}$ . It shows that the total assets of an entity are equal to the sum of its liabilities and equity. This equation is used to ensure that the accounting records are in balance.

### **Question 4:**

---

What is the difference between a debit and a credit?

**Answer:**

A debit is an entry on the left side of an account, while a credit is an entry on the right side of an account. Debits typically increase assets or expenses, while credits typically increase liabilities or equity.

**Question 5:**

What is the purpose of a trial balance?

**Answer:**

A trial balance is a list of all the accounts and their balances at a specific point in time. It is used to check the accuracy of the accounting records by ensuring that the total debits equal the total credits.
