Answer: Van der Waals forces

Question 3: What happens to the density of a liquid as its temperature increases?

Answer: Decreases

Question 4: What is the boiling point of a liquid?

Answer: The temperature at which its vapor pressure equals atmospheric pressure

Question 5: What is the process called by which a liquid changes into a gas?

Answer: Evaporation

How does personality influence second language learning? The development of personality Since Studies have shown that extroverts (or unreserved and outgoing people) acquire a second language better than introverts (or shy people), it seems also important for second language learners to develop personality. That is to say, try to be extrovert while study a second language.

What personality factors affect SLA? Based on Mohideen and Brown's perspectives on the role of individual personality factors, motivation, attitude, acculturation, self-esteem, sociability, risk-taking, perseverance have been selected for discussion as they are believed to significantly influence the learners' degree of

success in acquiring a L2 ...

How might personality impact a child's ability to acquire English? Student Personality More introverted students have been shown to take longer to acquire a language because they're more hesitant to make mistakes. Extroverted students, on the other hand, are more likely to go out on a limb and try out their newly learned vocabulary.

What is the relationship between personality and learning? A large portion of past research has focused on identifying learning styles, personality types, intelligence and adaptive strategies of teaching to meet the learning needs of students. Learning style research has also provided valuable insight regarding the relationship between personality type and learning style.

How does attitude affect second language learning? If there is a strong desire and positive attitude towards learning, there will be great results after all. Motivation is essential to learning another language. Pupils' perception of the usefulness of the languages they learn can clearly contribute to increasing their motivation.

What are three learner characteristics that may impact SLA? Motivation, attitude, age, intelligence, aptitude, cognitive style, and personality are considered as factors that greatly influence someone in the process of his or her second language acquisition.

What are the psychological factors affecting SLA? Psychological factors that influence second language acquisition include personality, self-esteem, tension, internal motivation, and brain structure of learning. Motivation and emotion are also important factors.

What are the cognitive factors affecting SLA? This document discusses cognitive factors that influence second language learning. It identifies two main categories of internal factors - affective factors like motivation, anxiety, and attitudes; and cognitive factors like intelligence, language aptitude, and learning strategies. Language aptitude includes abilities ...

How is language related to personality? Studies suggest that people are likely to change their personality depending on the language they speak. This phenomenon

is due to people's perceptions of the language and its culture. It is not difficult to imagine that you feel more confident speaking in your mother tongue than in a foreign language.

What are the factors that affect second language learning?

What are the 5 affective factors that influence the acquisition of second languages? They include acculturation, ego, personality, emotion, beliefs, attitudes, and motivation. The affective domain includes this set of factors.

What influences second language learning? These factors include age, aptitude, native language characteristics, learning and language environment, motivation, and cognitive abilities.

How does personality influence teaching and learning? Teaching and learning process can be influenced by the teacher's personality and mentality either positively or negatively. If the teacher has positive traits in his personality as being a passion, patient, cooperative, and authoritative, he will be a successful teacher, and he could get his students' satisfaction.

How is language related to personality? Studies suggest that people are likely to change their personality depending on the language they speak. This phenomenon is due to people's perceptions of the language and its culture. It is not difficult to imagine that you feel more confident speaking in your mother tongue than in a foreign language.

How do individual differences affect second language learning? The ability to acquire a second or third language varies greatly from one person to another after their teenage years. The differences are due to both innate ability and motivation. In other words, some people have a greater capacity to learn foreign languages than others.
