

CHAPTER 34 TELESCOPING THE TIMES COLONIES BECOMES NEW NATIONS ANSWERS

[Download Complete File](#)

What problems did the new nations of Ghana and Kenya face in Quizlet? The new nation of Ghana and Kenya faced the problems of weak economies. They also had a corruption in government, and ethnic conflicts. Mobutu ruled the Congo with harsh and corrupt rule caused the country to be poor.

Why has governing Indonesia proven difficult? Governing Indonesia was difficult because Indonesia is spread out. It has 13,600 islands and includes people from 300 different groups that speak 250 different languages. The Negritude movement was when Africans wanted independence.

What was one of the main struggles that new nations faced in Africa? Independence was seen as a necessary condition for development, democracy, and human rights. However, independence also brought many challenges and contradictions, such as internal conflicts, ethnic divisions, corruption, neocolonialism, and globalization.

What problems did newly independent nations encounter? Answer and Explanation: War is the main problem faced by many newly-independent nations. European colonies were usually formed of territories that contained a number of different religious, linguistic and ethnic groups. Often, these groups are at odds with one another.

Does Indonesia have a good government? Context. Over the last two decades, Indonesia has emerged as a regional leader whose democracy, prosperity, and

continued stability are critical to the Indo-Pacific region.

What tactics did Nkrumah use in Ghana? Nkrumah's first strategy was political mobilisation. He founded the Convention People's Party (CPP) in 1949, which became a powerful political force advocating for self-governance. The CPP mobilised the masses through strikes, boycotts, and demonstrations, which were instrumental in pressuring the British authorities.

What difficulties face anyone trying to make a unified country out of Indonesia? What difficulties face anyone attempting to unify Indonesia? Indonesia holds over 13,600 islands with 300 different groups who speak 250 different languages. This makes it almost extremely difficult to reach out to each group.

What are the major problems that African nations face? Africa is highly vulnerable to the impacts of climate change, with rising temperatures, changing rainfall patterns, and extreme weather events affecting various regions, impacting ecosystems and livelihoods, increasing water scarcity and contributing to desertification.

How did many colonies resist colonial rule? Resistance took many forms. Beyond the violent/non-violent binary, resistance was expressed through demands for equality and freedom, religious opposition, economic and labor organization, mass protest, and war. Colonial rule led to resistance and, ultimately, to independence.

Why has Africa struggled? CLIMATIC CONDITIONS. The African continent has been suffering more and more from climate change in recent decades: devastating floods and extraordinary drought periods lead to crop failures. The consequences are regular hunger crises and famine in Africa. Particularly affected are East Africa and the Sahel region.

What were the challenges that the new nation faced? Economic instability, political disunity, and foreign policy issues were among the most significant. These challenges tested the resilience of the new nation and shaped its future development.

Is Africa poor because of colonization? Africa countries emerged at independence with a complex path dependent set of institutions that were probably even worse than those which they had at the time of colonization. It was these that precipitated authoritarianism, sustained economic decline and reinforced the poverty we see in Africa today.

How did Africa decolonize? The decolonisation of Africa was a series of political developments in Africa that spanned from the mid-1950s to 1975, during the Cold War. Colonial governments gave way to sovereign states in a process often marred by violence, political turmoil, widespread unrest, and organised revolts.

What problems did the new country face following independence? The new nation also faced economic and foreign policy problems. A huge debt remained from the Revolutionary War and paper money issued during the conflict was virtually worthless. In violation of the peace treaty of 1783 ending the Revolutionary War, Britain continued to occupy forts in the Old Northwest.

What problems did these African nations face when attempting to gain independence? Some of the problems associated with decolonization is Every new state contained all sorts of conflicting interests, competing power bases and ethnic groups. Africa's nationalists had, on the whole, accepted the boundaries drawn up in the 1880's.

Which of the following problems were common in newly independent African nations? Explanation: The newly independent nations of Africa faced several problems as they transitioned from colonial rule to independence. Some of these problems included civil war, political chaos, economic devastation, and the challenge of establishing stable governments.

What posed one of the greatest problems to new African nations following decolonization? Tribal Rivalry posed one of the greatest problems to new African nations following decolonization.
