## [Download Complete File](#)

**What is KPI in plant maintenance?** A KPI is the combination of a metric, like downtime, and a benchmark, like a decrease of 25%, that quantifies success for a goal, like preventing downtime. Establishing maintenance KPIs makes your goals measurable and gives you quick insight into project progress.

**What are the Key Performance Indicators for maintenance?** While leading KPIs provide a perspective on future performance, lagging KPIs are result-type metrics. There are five standard maintenance performance KPIs: unscheduled downtime, reactive maintenance work hours, maintenance costs, mean time between failure, and work order cycle time.

**How do you measure performance of maintenance?** There are several ways to measure the performance of maintenance activities, including: Collecting and analyzing data on equipment availability, mean time between failures, mean time to repair, and maintenance cost per unit of production.

**What is kra in maintenance?** The term Key Result Areas (KRAs) refers to a short list of overall goals that guide how an individual does their job, or general achievement and progress goals for an organization or one of its divisions.

**What are leading and lagging indicators for maintenance?** Leading indicators tell you what's going to happen, whereas lagging indicators for maintenance tell you what has already happened.

**What is the KPI for reliability centered maintenance?** Reliability and Maintenance KPI #1: Overall Equipment Effectiveness (OEE) The first reliability and maintenance

KPI we'll explore is OEE. This metric is the gold standard that maintenance managers use to assess how well equipment is performing based on three factors: its availability, performance, and quality.

**What are the 5 key performance indicators?**
