The use of a lowercase i in DiSC is one way to distinguish Everything DiSC® and DiSC® Classic from other assessments that are based on the DISC model.

Why is time the fourth dimension? The fact that time is nonetheless different from the three spatial dimensions is why we single time out. Time is the fourth dimension because it makes sense to group the three spatial dimensions together as the first three. If one day we discover a fourth spatial dimension, then time would become the fifth dimension.

Did Einstein say time is the 4th dimension? According to Einstein , you need to describe where you are not only in three-dimensional space —length, width and height—but also in time. Time is the fourth dimension. So to know where you are, you have to know what time it is.

Do we exist in the 4th dimension? We move through three dimensions. Or do we? String theorists believe our world encompasses more than three dimensions. Without experiential evidence, the mathematical theory of space and time as a fourth dimension has remained just that since the days of Albert Einstein: a theory.

Paragraph 1: What is pH?

Question: What does pH measure?

Answer: pH measures the acidity or basicity of a solution.

Question: What is the pH range?

Answer: The pH range is from 0 to 14, with 0 being the most acidic and 14 being the most basic.

Paragraph 2: Indicators

Question: How do indicators work?

Answer: Indicators change color depending on the pH of a solution.

Question: What are some examples of indicators?

Answer: Some examples of indicators include litmus, phenolphthalein, and methyl orange.

Paragraph 3: Neutralization

Question: What is neutralization?

Answer: Neutralization is the reaction between an acid and a base, resulting in the formation of a salt and water.

Question: What happens to the pH of a solution after neutralization?

Answer: After neutralization, the pH of the solution will be 7, indicating a neutral solution.

Paragraph 4: Titration

Question: What is titration?

Answer: Titration is a technique used to determine the concentration of an unknown acid or base by adding a known concentration of the opposite reactant.

Question: What is the endpoint of a titration?

Answer: The endpoint of a titration is the point at which the reaction between the acid and base is complete, resulting in a color change of the indicator.

Paragraph 5: Gizmo Activity
