In her book, *Feminine Psychology*, which is a collection of articles Horney wrote on the subject from 1922–1937, she addresses previously held beliefs about women, relationships, and the effect of society on female psychology.

The Death of Money: Currency Wars, the Money Bubble, and How to Survive the Coming Economic Collapse

Introduction: The global financial system is on the brink of collapse, and the current monetary system is unsustainable. The death of money is imminent, and a new era of currency wars and a money bubble is upon us. This article will explore the current economic situation, the future of money, and provide insights on how to survive and prosper in the coming economic collapse.

Question 1: What is the Death of Money? Answer: The death of money refers to the end of the current fiat currency system, where central banks create money out of thin air. This system has led to excessive debt, inflation, and a loss of purchasing power. As the value of fiat currencies collapses, the concept of money as a store of value and medium of exchange will become obsolete.

Question 2: What are Currency Wars? Answer: Currency wars occur when countries intentionally devalue their currencies to gain a competitive advantage in international trade. This devalues foreign currencies and makes exports cheaper. However, currency wars can escalate into a downward spiral, as countries engage in a race to the bottom to devalue their currencies.

Question 3: What is the Money Bubble? Answer: The money bubble refers to the inflated asset prices, driven by excess liquidity and speculation. This bubble has been fueled by central bank policies, such as quantitative easing, which have created massive amounts of new money. As the bubble bursts, asset prices will

plummet, leading to financial instability and economic recession.

Question 4: How Can I Prepare for the Economic Collapse? Answer: To survive and prosper in the coming economic collapse, one should:

- Diversify assets into tangible assets such as real estate, commodities, and precious metals.
- Reduce debt and increase savings to minimize financial risk.
- Invest in knowledge and skills to adapt to the changing economic landscape.
- Build strong relationships within local communities for support and resource sharing.

Conclusion: The death of money, currency wars, and the money bubble are imminent threats to the global economy. While the future of money is uncertain, it is essential to prepare for the coming economic collapse. By diversifying assets, reducing debt, and investing in skills and community, individuals can weather the storm and emerge stronger from the economic turmoil.
