What is flora famous for? Flora was the Roman goddess of flowers, often associated with the coming of spring and the fertility of the land. She is commonly associated with Chloris, the Greek goddess of flowers and spring. The flower often associated with Flora was the rose, which symbolized love and beauty.

Why is it called flora? Flora means "flower" in Latin, and Flora was the Roman goddess of spring and flowering plants, especially wildflowers and plants not raised for food.

What is the unique bird in Malaysia? Mountain Peacock-pheasant (*Polyplectron inopinatum*) This elusive bird is considered endemic to the highlands in central Peninsular Malaysia. It lacks an obvious crest making it easier to differentiate with a Malayan Peacock-pheasant. This species is chestnut brown above with small ocelli and dark greyish below.

What is the most common bird in Malaysia? Yellow-vented Bulbul (*Pycnonotus goiavier*) is one of the most common birds that can be found in Malaysia. It is often classified as a community friendly bird as the species is easily spotted in the residential area.

What is Malaysia's national bird? National Bird of Malaysia: The national bird of Malaysia is generally recognised as the Rhinoceros Hornbill (*buceros hornbill*). It is also the state bird of Sarawak where the bird is particularly revered by the Dayak people. There are many species of hornbills.

What is the book flora about? In *The Book of Flora*, more than 40 years have passed and Flora lives on the relatively peaceful island of Bambritch. She has become the elder states-person, her understanding of this fragile world enriched by her experiences and the libraries she has pillaged over the years.

What is the flora of peninsular Malaysia book? The *Flora of Peninsular Malaysia*, Series II provides revisions for seed plant families that occur in Peninsular Malaysia. Volume 7 includes revisions of 119 species in 6 families, namely, Aizoaceae, Aniohyllaceae, Elaeocarpaceae, Myristicaceae, Nyssaceae and Passifloraceae.

What is an example of flora in Malaysia? Vegetation types Major forest types in Malaysia are lowland dipterocarp forest, hill dipterocarp forest, low hill dipterocarp forest, oak-laurel forest, montane ericaceous forest, peat swamp forest and mangrove forest.

What is the vegetation of Peninsular Malaysia? Forest area in Peninsular Malaysia consists of tropical rainforest. The structure of the low-land forest in Peninsular Malaysia is layered. The layer consisting of scrawny trees, major crown, plant ground and plants that grow on the land surface. Trees at the scrawny layer can reach a height of 60m to 70m.
