**What are the basic steps for creating a dashboard?**

**What is dashboard in UI design?** “A dashboard is a visual display of data used to monitor conditions and/or facilitate understanding.” Although a broad definition, it conveys the essence of dashboards accurately. The goal of a dashboard is to present information in a clear and direct way, thereby empowering users to achieve their goals quickly.

**How to build a metrics dashboard?**

**How to make a modern dashboard?** Provide basic data. A great dashboard design must display the relevant data in a simple and user-friendly format, so don't clutter your dashboard with excessive data. Instead, keep it simple and delete redundant data. Make use of white space and leave just enough for the user to understand the data structure easily.
