**What does Jean Aitchison say about language change?** Jean Aitcheson explains that changes in language originate from existing elements in language which then get exaggerated.

**Is Jean Aitchison a prescriptivist?** Aitchison's prescriptivist attitudes Aitchison created 3 models to describe attitudes towards language change. However it is important to note that Aitchison does not believe that language change is any of these things – quite the opposite – she is a descriptivist. These are attitudes which prescriptivists have.

**What is Jean Aitchison's theory?** Jean Aitchison. The Three Metaphors. Infectious Disease Syndrome Theory. This theory states that 'bad' or 'poor' language spreads like a disease through a population. Changes catch on in social groups and move fast.

**What are Aitchison criteria for language?** Aitchison (1983) proposed four unique criteria distinguishing human language from animal communication. These include displacement, structure dependence, semanticity and creativity.

**What are Jean Aitchison's metaphors?** Aitchison suggests that the "crumbling castle", "damp spoon" and "infectious disease" approaches are exhibited by many prescriptivist thinkers. The "Crumbling Castle" myth likens the English language to a castle. It suggests that although English was once a great castle, over time it has decayed and crumbled.

**What do Prescriptivists believe about language change?** Prescriptivists see language as right or wrong and rarely consider the contexts in which languages arise and evolve. A prescriptive approach can in some cases be used to debase other, legitimate but non-standard, forms of English. This can lead to negative associations.

**Who said language change is inevitable?** Roman Jakobson – Russian Linguist – 1949 – “Continual language change is natural and inevitable, and is due to a combination of psycholinguistic and sociolinguistic factors.”

**What are the stages of linguistic development according to Aitchison?** In Aitchison (1987), she identifies three stages that occur during a child's acquisition of vocabulary: labelling, packaging and network building.

**Why can't children learn language through imitation?** Chomsky points out that a child could not possibly learn a language through imitation alone because the language spoken around them is highly irregular – adult's speech is often broken up

and even sometimes ungrammatical.

**Is language change inevitable?** Abstract. All languages change over time and change is inevitable for any living language. History records that languages change over time at every level of structure.

**What is language according to Aitchison?** According to Aitchison, language is the specialized sound signaling system which seems to be genetically programmed to develop in humans.

**What are the five components of linguistic competence?** Linguists have identified five basic components (phonology, morphology, syntax, semantics, and pragmatics) found across languages.

**What are the 4 criteria of language?** These criteria were proposed by sociolinguist Roger T. Bell in 1976 and they are: standardization, vitality, historicity, autonomy, reduction, mixture, and de facto norms. They help to define what makes some languages more 'developed' than others, and how to distinguish between a language and a dialect.
