- Cut-off testing: Evaluating transactions before and after the inventory count date to ensure accuracy.

**Question 3: Discuss the importance of internal control in an audit.**

**What is the National House Building Council (NHBC)?** The National House Building Council (NHBC) is a non-profit organization in the United Kingdom that provides warranty and insurance services to homeowners, builders, and lenders involved in new residential construction. It was established in 1936 to protect homeowners from financial losses due to faulty workmanship or materials in their homes.

**What are the benefits of an NHBC warranty?** An NHBC warranty provides up to 10 years of protection against defects in workmanship, materials, and structural integrity. This coverage includes:

Defects that could make the home uninhabitable  
Major structural defects  
Damage to the roof, walls, or foundations  
Plumbing and electrical systems failures

**Who can apply for an NHBC warranty?** Owners or builders of newly constructed homes in the UK can apply for an NHBC warranty. The home must meet certain construction standards and pass an inspection before the warranty is issued.

**How much does an NHBC warranty cost?** The cost of an NHBC warranty varies depending on the size of the home and the level of coverage desired. Typically, the cost ranges from £2,000 to £5,000.

**Is an NHBC warranty worth it?** An NHBC warranty can provide valuable peace of mind for homeowners by ensuring financial protection against major defects in their new home. However, it is important to note that the warranty does not cover all types of defects, such as cosmetic issues or damage caused by natural disasters or wear and tear.
