What are the survival benefits of neoadjuvant chemotherapy in breast cancer? Studies have demonstrated no difference in survival between adjuvant or neoadjuvant settings [1]. However, neoadjuvant therapy improves breast-conserving surgery success rates due to tumor downstaging [5,6,7] and allows for response assessment.

Does neoadjuvant chemo cause metastasis? Furthermore, neoadjuvant chemotherapy increases the release of tumor-derived extracellular vesicles that might facilitate the formation of metastasis [11,26].

What are the guidelines for neoadjuvant chemotherapy?
