

# Blackwells five minute veterinary consult clinical companion small animal end

## [Download Complete File](#)

**What is a reproductive vet called?** A veterinary reproductive specialist, also called a theriogenologist, is a board-certified specialist in reproduction.

**What is an AVA veterinary?** Upon graduation from a NAVTA approved veterinary assistant program, a participant is eligible to sit for the Approved Veterinary Assistant examination. Veterinary assistants that successfully complete the exam receive a documenting certificate and are entitled to use the designation AVA (Approved Veterinary Assistant).

**What is a pet doula?** Doulas support animals and their owners with compassionate care in a number of ways, including emotional and informational support during this difficult time.

**What is a female dog reproductive surgery?** Ovariohysterectomy—the typical "spay": In female pets, the ovaries, fallopian tubes, and uterus are removed. This makes the animals unable to reproduce. Removing the ovaries eliminates the main source of hormones that drive the female's heat cycle and behavior related to the breeding instinct.

**Do vets recommend Ava?** AVA is Veterinary Approved and a perfect choice for those wanting to feed a quality wholesome food. Features: Advanced formulation - High quality source of easily digestible protein. Hypoallergenic recipes - With no added wheat or wheat gluten.

**What does CVA stand for in veterinary?** The Certified Veterinary Assistant program (CVA) is a learn-on-the-job vocational training experience that covers the basic fundamentals of veterinary medicine and animal care and handling.

**What does BVS stand for veterinary?** Bachelor of Veterinary Science, a degree.

**What is a reproductive doctor called?** A reproductive endocrinologist, sometimes referred to as an RE, is an obstetrician/gynecologist (OB/GYN) physician who diagnoses and treats endocrine disorders that are either directly or indirectly related to reproduction.

**What are the two types of vets?**

**What is the branch of veterinary medicine concerned with reproduction?**

Theriogenology is the branch of veterinary medicine concerned with reproduction - including the physiology and pathology of male and female reproductive systems, and the clinical practice of veterinary obstetrics, gynecology, and andrology.

**What does a theriogenologist do?** About the Service Theriogenology is the branch of veterinary medicine that focuses on reproduction, including the physiology and pathology of male and female reproductive systems in animals and the clinical practice of veterinary obstetrics, and gynecology.
