- Avoid distorted or blurred images.
- Consider the lighting and how it affects the subject's face.

3. How do I measure proportions?

- Use a grid to divide the photo into equal squares.
- Transfer the grid onto your drawing surface and use it to maintain proportions.
- Measure the distances between facial features using a ruler or pencil.

4. How do I draw the eyes, nose, and mouth?

- **Eyes:** Pay attention to the shape, size, and position of the eyes. Use a light touch to sketch in the outlines and pupils.
- **Nose:** Observe the width, length, and shape of the nose. Draw the nostrils and bridge using soft, smooth lines.

- **Mouth:** Study the shape and curve of the lips. Use light strokes to outline the mouth and add detail to the lips and teeth.

5. How do I shade and add details?

- Use a variety of pencil grades to create different shades and textures.
- Use a blending stump to smooth transitions and create a natural look.
