**Why I Stopped Being a Vegetarian**

By Laura Fraser

After being a vegetarian for 20 years, I recently made the decision to start eating meat again. This was a difficult decision, but one that I ultimately made for my health and well-being.

---

### **What were your reasons for becoming a vegetarian in the first place?**

I became a vegetarian in my early 20s, primarily for ethical reasons. I didn't want to contribute to the suffering of animals in factory farms. I also believed that a vegetarian diet was healthier and more environmentally friendly.

### **What changed your mind?**

Over time, I began to experience health problems, including fatigue, hair loss, and difficulty concentrating. My doctor suggested that I might be deficient in certain nutrients, such as iron and vitamin B12, which are difficult to obtain from plant-based sources alone.

### **How did eating meat again affect your health?**

After I started eating meat again, I noticed a significant improvement in my health. My energy levels increased, my hair grew back, and my cognitive function improved. I also felt more satisfied after meals.

### **Do you still have ethical concerns about eating meat?**

Yes, I do. I am still opposed to factory farming and the inhumane treatment of animals. However, I believe that it is possible to eat meat ethically by supporting farms that prioritize animal welfare. I choose to buy meat from farmers who raise their animals humanely and without the use of antibiotics or hormones.

### **What advice would you give to someone considering becoming a vegetarian or returning to eating meat?**

My advice to anyone considering becoming a vegetarian or returning to eating meat is to do their research and make an informed decision based on their own health and ethical beliefs. There is no right or wrong answer, and what works for one person may not work for another. It's important to listen to your body and make the choice that feels right for you.
