Write Your Dissertation in Fifteen Minutes a Day with Joan Bolker

Joan Bolker, Director of the Writing Program at the University of California, Berkeley, has developed a revolutionary approach to writing that claims you can write your dissertation in just 15 minutes a day.

1. Can I Really Write My Dissertation in 15 Minutes a Day?

Yes, according to Bolker's method. The key is to break down the task into small, manageable chunks. By spending just 15 minutes each day on your dissertation, you can make significant progress over time.

2. What Is the Bolker Method?

Bolker's method involves three steps:

- **Divide your dissertation into 200 smaller tasks:** This could be researching a particular topic, writing a section of the introduction, or analyzing data.

- **Set a daily writing time:** Choose a time each day when you can set aside 15 minutes for writing.
- **Focus on one task at a time:** During your 15-minute writing session, concentrate on completing a single task.

3. What Are the Benefits of the Bolker Method?

The Bolker method offers several benefits, including:

- **Reduced stress:** By breaking down the dissertation into smaller tasks, you can avoid feeling overwhelmed.
- **Increased efficiency:** By focusing on one task at a time, you can make more progress than if you try to multitask.
- **Improved time management:** Setting aside a specific time each day for writing ensures that you make progress on your dissertation regularly.

4. What Are Tips for Using the Bolker Method?

- **Be consistent:** Try to write for 15 minutes each day, even if you don't feel like it.
- **Don't be afraid to freewrite:** Write whatever comes to mind, without editing or worrying about perfection.
- **Set realistic goals:** Don't try to write too much in 15 minutes. Focus on completing a single task.

5. Can the Bolker Method Work for Everyone?

While the Bolker method has been successful for many students, it may not work for everyone. If you struggle with procrastination or find it difficult to focus, you may need to experiment with other writing strategies. However, if you are willing to commit to writing 15 minutes each day, the Bolker method can help you make substantial progress on your dissertation.

What was the infamous question 6 from the 1988 math Olympiad? Problem #6 at IMO 1988: Let a and b be positive integers such that $ab + 1$ divides $a^2 + b^2$. Prove that $(a^2 + b^2)/(ab + 1)$ is a perfect square.
