

2007 ford focus transmission problems

Download Complete File

Common Faults of the 2007 Ford Focus**

The 2007 Ford Focus is known for certain common faults, including:

- **Transmission problems:** Transmission issues are a significant concern with this model year.
- **Electrical issues:** Electrical glitches, such as faulty wiring or malfunctioning components, can occur.
- **Engine problems:** Some owners have experienced engine issues, including oil leaks or cooling system failures.
- **Suspension problems:** The suspension system can experience wear and tear, leading to handling and ride quality issues.

Transmission Problems in the 2007 Ford Focus

The most common transmission problem with the 2007 Ford Focus is premature failure. This issue is typically caused by:

- **Overheating:** The transmission may overheat due to insufficient cooling or excessive stress.
- **Lack of lubrication:** Insufficient transmission fluid can lead to excessive wear and failure.
- **Manufacturing defects:** Some Focus models may have had faulty transmission components from the factory.

Resetting the Transmission Control Module (TCM) on a 2007 Ford Focus

To reset the TCM on a 2007 Ford Focus, follow these steps:

1. Turn the ignition key to the "On" position without starting the engine.
2. Hold down the gas pedal fully for 30 seconds.
3. Turn the ignition key to the "Off" position.
4. Wait 30 seconds.
5. Start the engine and allow it to idle for 5 minutes.

Transmission Type in a 2007 Ford Focus

The 2007 Ford Focus comes with either a 4-speed automatic or a 5-speed manual transmission.

Reliability of the 2007 Ford Focus

The 2007 Ford Focus has received mixed reviews for reliability. Some owners have experienced significant issues, particularly with the transmission, while others have found it to be a reliable vehicle.

Transmission Recall for the 2007 Ford Focus

The 2007 Ford Focus was subject to a transmission recall for certain model years. The recall addressed issues with premature transmission failure.

Mileage of a 2007 Ford Focus

With proper maintenance, a 2007 Ford Focus can last for 150,000 to 200,000 miles.

Fuel Efficiency of the 2007 Ford Focus

The 2007 Ford Focus is rated for 20 mpg in the city and 30 mpg on the highway with the automatic transmission. With the manual transmission, fuel efficiency is slightly better at 23 mpg in the city and 35 mpg on the highway.

Timing Belt or Chain in a 2007 Ford Focus

The 2007 Ford Focus has a timing belt. It is recommended to replace the timing belt every 60,000 to 100,000 miles.
