Toyota T100: A Comprehensive Guide\*\*

### Introduction

The Toyota T100 was a mid-size pickup truck produced by Toyota from 1993 to 1998. It was based on the Toyota Hilux and was designed to compete with the Ford Ranger and Chevrolet S-10.

### Engine

The Toyota T100 offered two engine options:

- 3.0-liter V6 engine (early models)
- 3.4-liter V6 engine (later models)

### Wiring Diagram

On a Toyota wiring diagram, the color code for the neutral (N) wire is **black**.

### T100 and Hilux

The Toyota T100 is closely related to the Toyota Hilux, which is a popular pickup truck in many countries around the world. However, the T100 is a distinct model with its own unique design and features.

### Reliability

The Toyota T100 is known for its reliability and durability. It consistently ranks well in owner satisfaction surveys.

## **Wire Identification**

To determine if a wire is L or N, use a multimeter to measure the voltage between the wire and ground.

- L wire: 120 volts
- N wire: 0 volts

## **Wire Colors**

- L1 wire: Red or black
- L2 wire: Black or white

## **Classic Status**

The Toyota T100 is not considered a classic car, as it was only produced for a relatively short period of time and did not achieve widespread popularity.

## **Production Numbers**

According to estimates, around 600,000 Toyota T100s were produced during its five-year production run.

## **Payload and Weight**

The Toyota T100 had a maximum payload capacity of approximately 2,200 pounds and a curb weight of around 4,000 pounds.

## **Discontinuation**

The Toyota T100 was discontinued in 1998 and was replaced by the Toyota Tundra.

## **SR5 Trim**

The SR5 trim level on the Toyota T100 denoted a higher level of equipment and features, including upgraded interior materials and a more powerful engine.

## **Engine Options**

In addition to the two V6 engines, the Toyota T100 also offered a 2.4-liter I4 engine in some markets.

### **Other Toyota Engine Information**

- The Toyota Land Cruiser uses a variety of engines, including a 4.0-liter V6 and a 5.7-liter V8.
- The Toyota Hiace uses a 2.7-liter I4 engine.
- The Toyota 1NZ engine is used in several Toyota models, including the Corolla and Echo.
- Toyota uses a variety of engines, including inline-fours, V6s, and V8s.
- The 1HZ engine is considered the most reliable engine for the Land Cruiser.
- The 100 series Land Cruiser uses a 4.2-liter I6 engine.
- The Land Cruiser was called a V8 due to its use of a powerful V8 engine.
- The 2.7-liter 3RZ engine is considered the best engine for the HiAce.
- The HiAce and Hilux do not share the same engine.
- The 1995 Toyota HiAce uses a 2.4-liter I4 engine.
- The 1NZ engine is more reliable than the 2NZ engine.
- The Toyota Supra uses a BMW engine.
- Toyota engines are primarily manufactured in Japan.
- To identify your Toyota engine, refer to the engine code engraved on the engine block.
- The 2JZ engine is known for its longevity and performance.
- Toyota engines are not made in China.
