Wilkie 1994: Unravelling Consumer Behavior

In 1994, Professor William L. Wilkie published his seminal work, "Consumer Behavior," which has become a cornerstone of the field. The book presents a comprehensive framework for understanding the complex factors that influence consumer decision-making.

1. What is consumer behavior?

Consumer behavior refers to the mental and physical processes involved in buying, using, and disposing of products and services. It encompasses the entire customer journey, from awareness and consideration to purchase and post-purchase evaluation.

2. What are the key influences on consumer behavior?

Wilkie identifies three primary influences on consumer behavior: cultural, social, and psychological. Cultural factors include the beliefs and values shared by a society, while social factors involve the influence of family, friends, and peer groups. Psychological factors encompass individual personality traits, motivations, and cognitive processes.

3. How do consumers make decisions?

Wilkie proposes that consumers engage in a multi-stage decision-making process. This process typically involves problem recognition, information search, evaluation of alternatives, purchase decision, and post-purchase evaluation.

4. What are the ethical implications of consumer behavior research?

Wilkie emphasizes the ethical responsibilities of researchers who study consumer behavior. Researchers must respect the privacy of consumers, protect them from harm, and ensure that their findings are used for ethical purposes.

5. How has consumer behavior changed over time?

Wilkie acknowledges that consumer behavior is constantly evolving due to factors such as technological advancements, globalization, and changing societal norms. For example, the digital age has revolutionized the way consumers access information, shop, and interact with brands.

Understanding consumer behavior is crucial for businesses, policymakers, and researchers alike. Wilkie's framework provides a valuable foundation for developing effective marketing strategies, public policy interventions, and academic research in this dynamic field.
