#### Worksheet 2: Input Devices in ICT

##### 1. What is an input device?

An input device is a hardware component that allows a user to enter data or instructions into a computer system. It converts real-world signals into digital form that the computer can process.

##### 2. List three common input devices and describe their functions.

- **Keyboard:** Used for entering text, numbers, and commands by pressing keys.
- **Mouse:** Used for controlling the on-screen cursor and selecting items by moving it.
- **Scanner:** Captures images or documents and converts them into digital form.

##### 3. Explain the difference between a direct and indirect input device.

- **Direct input device:** Converts physical input directly into digital signals, such as a keyboard or mouse.
- **Indirect input device:** Requires additional hardware or software to convert input into digital signals, such as a microphone or gaming controller.

##### 4. What is a touchscreen and how does it work?

A touchscreen is an input device that detects the presence of a finger or stylus on its surface. It uses capacitive or resistive technology to sense the change in capacitance or resistance caused by the contact.

### **5. Describe the advantages and disadvantages of optical input devices.**

#### **Advantages:**

- Highly accurate
