### **Taylor Swift's 'Fearless (Taylor's Version)'**

#### **What is 'Fearless (Taylor's Version)'?**

'Fearless (Taylor's Version)' is the re-recorded version of Taylor Swift's second studio album, 'Fearless', which was originally released in 2008. Swift announced the re-recording project in 2019 following a dispute over the rights to her master recordings.

#### **Why did Taylor Swift re-record 'Fearless'?**

Taylor Swift re-recorded 'Fearless' to regain ownership of her music and control over her artistic legacy. After her former record label, Big Machine Records, was sold in 2019, the label's new owner, Scooter Braun, acquired the master recordings to Swift's first six albums, including 'Fearless'. This meant that Swift did not have the right to use her own songs without permission from Braun.

#### **What tracks are included on 'Fearless (Taylor's Version)'?**

'Fearless (Taylor's Version)' includes all 13 tracks from the original 'Fearless' album, as well as six additional songs that were previously released as bonus tracks or singles, including "Today Was a Fairytale" and "White Horse".

#### **What are the differences between 'Fearless' and 'Fearless (Taylor's Version)'?**

While the tracklist of 'Fearless (Taylor's Version)' remains largely the same as the original, there are some noticeable differences in the sound. Swift's vocals are more mature and polished on the re-recorded version, and the production is updated with modern instruments and a more contemporary feel.

## **What impact has 'Fearless (Taylor's Version)' had?**

'Fearless (Taylor's Version)' has been a commercial and critical success, topping the charts worldwide and receiving widespread praise for its updated sound and Swift's commitment to reclaiming her music. The album has also sparked conversations about the importance of artists owning the rights to their work and the legal protections available to musicians in the music industry.
