TT Retrofit Guide: FAQs Answered

1. What is a TT Retrofit?

A TT retrofit involves upgrading an existing electrical system to a Type TT earthing arrangement. This involves connecting the exposed conductive parts of the installation to earth via a separate earth electrode, without relying on the neutral conductor.

2. Why Should I Consider a TT Retrofit?

TT retrofits can enhance electrical safety by reducing the risk of electric shocks and electrocution. It's particularly recommended for properties with certain types of earthing arrangements, such as PME (Protective Multiple Earthing) or TN-C-S (Combined Neutral and Earth), which may have limitations or pose safety concerns.

3. How Do I Determine if My Property Requires a TT Retrofit?

To determine if your property requires a TT retrofit, a qualified electrician should inspect the electrical system and assess factors such as the earthing system currently in use, the condition of the electrical wiring, and the presence of any potential hazards.

4. What are the Benefits of a TT Retrofit?

- Enhanced electrical safety
- Reduced risk of electric shocks and electrocution
- Improved compliance with electrical regulations
- Increased peace of mind

5. How Can I Get a TT Retrofit Done?

To get a TT retrofit, contact a registered electrician who specializes in electrical safety and has experience with earthing upgrades. They will conduct a site inspection, assess the property's electrical system, and recommend the most appropriate earthing arrangement. The electrician will then carry out the necessary modifications, ensuring that the system meets all relevant safety standards.
