How to answer why surgery? WHY DID YOU CHOOSE SURGERY AS YOUR MEDICAL SPECIALTY? Surgery attracted me because it offers so many diverse opportunities to help patients and new challenges every day. I also enjoy being a part of team-based patient care, knowing that we are all working on the problem and finding the best fix.

What is surgical disease? We have arbitrarily decided to define a surgical condition as any condition that requires suture, incision, excision, manipulation, or other invasive procedure that usually, but not always, requires local, regional, or general anesthesia.

What are the most common reasons for surgery?

What makes you fit for surgery? Getting active before surgery will benefit most people. This is because your heart and lungs will have to work harder after an operation to help your body to heal. Regular exercise makes your heart and lungs stronger, so they'll be in the best possible shape to help you heal.

What is the most painful surgery? Specific surgical procedures associated with intense pain include open-heart surgery, spinal fusion surgery, total knee replacement surgery, and abdominal surgery involving major organ removal or reconstruction.

What is the most riskiest surgery?

What is the most invasive surgery? Bundled surgical procedures tend to be the most invasive, with the longest surgery time and recovery period. Some common surgical procedures in this category are: Body — Plastic Surgery After Dramatic

When should you not have surgery? Examples of Conditions that May Delay Surgery Include: Pneumonia or bronchitis within a month before surgery. Stomach virus or flu. Fever. Asthma attack or wheezing within two weeks before surgery.

Why no deodorant before surgery? You can't wear deodorant during surgery because it can leave a residue on your skin that's difficult to remove. This residue might make it challenging for the surgeon to cut through the incision site or accurately assess your skin circulation during surgery.

What makes someone a poor surgical candidate? People with congestive heart failure (CHF), lung disease, uncontrolled diabetes, or advanced kidney disease may be excluded from surgery. In addition, people with severe psychiatric illnesses are often unsuitable candidates for certain surgical procedures as these conditions increase the risk of complications.

Why are you interested in surgery? Perhaps one of the most obvious reasons to consider becoming a surgeon is the capacity it can give you to help others and save lives. Surgeons perform necessary operations for patients recovering from illnesses, injuries or health complications.

Why do you want to work in operation? I want to become an Operations Manager simply because this is the role I am most comfortable in, and my natural skills, qualities and attributes are all geared up for becoming a highly competent and productive Operations Manager. If you hire me, I will not let you down."

Why would you get surgery? Some operations can relieve or prevent pain. Others can reduce a symptom of a problem or improve some body function. Some surgeries

are done to find a problem. For example, a surgeon may do a biopsy, which involves removing a piece of tissue to examine under a microscope.

How to answer why orthopedic surgery? What is the moral of the story *The Secret Garden*? I think the lesson of the book was, that life is very difficult so don't push yourself too hard. Take your time, nurture your spirit, take time out, if it's really too much, go into hiding until you are ready to cope with life again. Find your own secret garden, where you can be at peace and heal your soul.
