#### Soal UN Biologi SMA IPA 2014 Cloteh Guru

##### Paragraf 1

Salah satu soal UN Biologi SMA IPA tahun 2014 yang dibahas oleh cloteh guru adalah tentang sistem peredaran darah. Soal tersebut berbunyi, "Jelaskan mekanisme pengangkutan oksigen oleh darah!"

##### Jawaban:

Darah bertugas mengangkut oksigen ke seluruh tubuh melalui mekanisme hemoglobin. Hemoglobin merupakan protein dalam sel darah merah yang mengikat oksigen di paru-paru. Saat darah beredar melalui tubuh, oksigen dari hemoglobin dilepaskan ke sel-sel yang membutuhkan.

##### Paragraf 2

Soal lainnya yang dibahas adalah tentang proses respirasi. Soal tersebut berbunyi, "Jelaskan perbedaan antara respirasi aerob dan anaerob!"

##### Jawaban:

Respirasi aerob adalah proses respirasi yang membutuhkan oksigen, sedangkan respirasi anaerob tidak membutuhkan oksigen. Respirasi aerob menghasilkan lebih banyak energi dibandingkan respirasi anaerob. Pada respirasi aerob, glukosa dipecah menjadi karbon dioksida dan air, sementara pada respirasi anaerob, glukosa dipecah menjadi asam laktat.

### **Paragraf 3**

Soal selanjutnya membahas tentang sistem saraf. Soal tersebut berbunyi, "Jelaskan bagian-bagian neuron dan fungsinya!"

#### **Jawaban:**

Neuron memiliki tiga bagian utama, yaitu dendrit, badan sel, dan akson. Dendrit menerima sinyal dari neuron lain, badan sel memproses sinyal, dan akson mengirimkan sinyal ke neuron lain atau ke sel efektor.

### **Paragraf 4**

Soal berikutnya berkaitan dengan genetika. Soal tersebut berbunyi, "Jelaskan hukum mendel tentang pewarisan sifat!"

#### **Jawaban:**

Hukum Mendel tentang pewarisan sifat terdiri dari dua hukum, yaitu hukum segregasi dan hukum distribusi bebas. Hukum segregasi menyatakan bahwa setiap individu menghasilkan gamet yang hanya membawa satu alel untuk setiap gen. Hukum distribusi bebas menyatakan bahwa alel dari gen berbeda akan berdistribusi secara bebas ke gamet.

### **Paragraf 5**

Soal terakhir yang dibahas oleh cloteh guru adalah tentang evolusi. Soal tersebut berbunyi, "Jelaskan mekanisme seleksi alam!"

#### **Jawaban:**

Seleksi alam adalah mekanisme evolusi yang menyatakan bahwa individu yang memiliki sifat yang lebih sesuai dengan lingkungan akan lebih cenderung bertahan hidup dan berkembang biak. Akibatnya, sifat-sifat tersebut akan menjadi lebih umum dalam populasi dari waktu ke waktu.

**What is the latest edition of Ross and Wilson anatomy and physiology?** Now in its fourteenth edition, this best-selling textbook has been honed over many years to provide a clear, straightforward introduction to the human body for students of nursing, allied health or biomedical and paramedical science.

#### **Who published Ross and Wilson's 13th edition?**

**What is the synopsis of Ross and Wilson anatomy and physiology in health and illness?** One of the world's most popular textbooks of anatomy and physiology, it introduces the structure and functions of the human body and the effects of disease or illness on normal body function.

**What is homeostasis according to Ross and Wilson?** Homeostasis is maintained by control systems that detect and respond to changes in the internal environment. A control system (Fig. 1.4) has three basic components: detector, control centre and effector. The control centre determines the limits within which the variable factor should be maintained.

**What is anatomy and physiology is all about?** Anatomy and physiology are two of the most basic terms and areas of study in the life sciences. Anatomy refers to the internal and external structures of the body and their physical relationships, whereas physiology refers to the study of the functions of those structures.

**What is anatomy and physiology in public health?** Anatomy is the study of the structures associated with the human body. Physiology is the study of the function of each of these structures. The human body is often thought of as a complicated machine.

**What is the anatomy and physiology of homeostasis?** Homeostasis is the activity of cells throughout the body to maintain the physiological state within a narrow range that is compatible with life. Homeostasis is regulated by negative feedback loops and, much less frequently, by positive feedback loops.

**What is homeostasis teach me physiology?** Homeostasis is involved in every organ system of the body. In a similar vein, no one organ system of the body acts alone; regulation of body temperature cannot occur without the cooperation of the integumentary system, nervous system, musculoskeletal system, and cardiovascular system at a minimum.

**How does homeostasis maintain healthy body function?** Homeostasis involves three mechanisms: the receptor, control center, and effector. These all work together to help keep your body in balance by noticing changes and then acting upon them to regulate your systems. Receptors. Often cells, tissues, or organs, these elements track your environment and spot any changes.

**What is the best anatomy and physiology book for beginners?** Loose Leaf for Hole's Human Anatomy & Physiology Loose leaf is great for novice students who

require an introduction to basic biological principles anatomy and physiology. It was written with students in mind and designed to help students grasp core concepts and theories.

**What is the elements of moral philosophy James Rachels about?** The Elements of Moral Philosophy is a 1986 ethics textbook by the philosophers James Rachels and Stuart Rachels. It explains a number of moral theories and topics, including cultural relativism, subjectivism, divine command theory, ethical egoism, social contract theory, utilitarianism, Kantian ethics, and deontology.

**What is the moral theory of Rachels?** Such a theory would see morality as based on facts about our nature and interests, rather than on some exaggerated conception of our "importance." As for the principles on which we ought to act, the theory is a combination of two ideas: first, that we ought to act so as to promote the interests of

everyone alike; and ...

**What is morality in the elements of moral philosophy Rachel James?** In chapter one of James Rachels's *What is Morality*, he argues that at the very minimum, morality is using reason to guide one's decisions, while keeping in mind the interests of those who will be affected by one's choice, without giving more weight to one individual over another.

**What are the main features of James Rachels minimum conception of morality?** James Rachels suggests two criteria fulfilling a minimum conception of morality -- reason and impartiality. By the use of reason Rachels means that a moral decision must be based on reasons acceptable to other rational persons.

**What does James Rachels argue?** He argued that, if we allow passive euthanasia, we should also allow active euthanasia, because it is more humane, and because there is no significant moral difference between killing and allowing to die. *The End of Life* (1986), a moral treatise on life and death, broadened and deepened these ideas.

**What does James Rachels say about moral relativism?** He argues that it is unacceptable to believe the absence of universal truth as claimed by the cultural relativists. Rachels inferred that it is obstructive to give in the absence of an objective moral code by using the reasoning of disagreement among communities on which actions are moral and which are not.

**What best describes Rachels main argument?** Rachels challenged the conventional view that active euthanasia is morally wrong while passive euthanasia is considered morally permissible. He argued that, in both cases, the intent is the same: to end suffering. The outcome is also the same, as both result in the termination of the patient's life.

**What is Rachels main objection to the cultural differences argument?** According to Rachels, what is the main objection to the "Cultural Differences" argument? The argument is unsound. In other words, the argument is invalid, since the conclusion does not necessarily follow from the premise, and all invalid arguments are unsound.

**What does Rachels mean in saying that moral judgments must be backed by good reasons?** What does Rachels mean in saying that moral judgments must be backed by good reasons? Moral judgments are not like matters of taste. That is, a necessary condition for a good moral judgment is that some good reasons can be given in support of it.

**What are the elements of morality?**

**What are the three principles of moral philosophy?** Three common frameworks are deontology, utilitarianism, and virtue ethics. The last branch is applied ethics . It addresses specific, practical issues of moral importance such as war and capital punishment.

**What is the message of the moral?** The moral of a story is the lesson that story teaches about how to behave in the world. Moral comes from the Latin word mores, for habits. The moral of a story is supposed to teach you how to be a better person. If moral is used as an adjective, it means good, or ethical.

**What does Rachels mean by impartiality?** Ethics includes the idea of impartiality. Rachels' basic idea is that that each individual's interests and point of view are equally important. This is one of the most important ideas in ethics, one we will return to many times.

**What are the universal cultural values suggested by James Rachels?** According to James Rachels, there are three universal moral standards which are a rule against murder, caring for enough infants to keep the culture going, and a rule against lying.

**What does Rachels believe about some of the elements of cultural relativism are true?** Rachels believes that some of the elements of cultural relativism are true. Rachels explains that King Darius of ancient Persia realized that the Callatians and the Greeks has the same exact funeral customs. Cultural relativist claim that: It is mere arrogance for us to try to judge the conduct of other people.

**What are the elements of moral Judgement?** The moral judgment system covers three moral judgments: moral polarity, moral type, and moral intensity. Moral polarity refers to the conformity of behavior to moral norms and can be divided into positive

moral polarity and negative moral polarity.

**What are the key elements of the moral point of view?** These then are the five formal properties of a moral point of view: inclusivity, sympathy, realizability, information, and justice.

**What are the main elements of the moral experience?** Against this backdrop, 'Moral Experience' includes a wide range of concepts like moral consciousness, moral sense, moral sentiments, moral dilemmas, moral principles and moral judgments. Moral experience investigates all these as human events.

**What does Rachels believe about some of the elements of cultural relativism are true?** Rachels believes that some of the elements of cultural relativism are true. Rachels explains that King Darius of ancient Persia realized that the Callatians and the Greeks has the same exact funeral customs. Cultural relativist claim that: It is mere arrogance for us to try to judge the conduct of other people.
