Tony Gaddis Visual Basic Program Challenge Solutions

Tony Gaddis' Visual Basic Programming, a renowned textbook in computer science education, offers a comprehensive set of programming challenges to enhance students' understanding of fundamental concepts. These challenges cover a wide

range of topics, from decision-making and looping to arrays and object-oriented programming.

Q1: Calculate the Sum of N Numbers Using a Loop

- **Challenge:** Write a program that takes an integer *n* as input and calculates the sum of the consecutive numbers from 1 to *n*.
- **Solution:** Use a For loop to iterate through the numbers from 1 to *n* and accumulate their sum in a running total variable.

Q2: Find the Smallest and Largest Numbers in an Array

- **Challenge:** Write a program that takes an array of integers *arr* as input and finds the smallest and largest elements in the array.
- **Solution:** Use two for loops: one to iterate through the array and find the smallest element, and the other to find the largest element. Compare each element with the current minimum/maximum value and update it if necessary.

Q3: Find the Mode of a List of Numbers

- **Challenge:** Write a program that takes a list of integers *nums* as input and finds the mode, which is the value that occurs most frequently in the list.
- **Solution:** Use a dictionary to store the counts of each number in the list. Iterate through the dictionary to find the key with the highest value.

Q4: Reverse a String

- **Challenge:** Write a program that takes a string *str* as input and reverses its characters.
- **Solution:** Use a For loop to iterate over the characters of the string in reverse order, appending them to a new *StringBuilder*.

Q5: Create a Custom Class to Represent a Student

- **Challenge:** Write a program that creates a custom class called *Student* with properties for name, age, and GPA. Create an instance of the *Student* class

and set its properties.

- **Solution:** Define a public class Student with public properties for name, age, and GPA. Create an instance of the Student class and set its properties using dot notation.
