## [Download Complete File](#)

**Is the following sentence true or false: the speed of a wave depends on the medium through which it travels?** The medium may be a solid, a liquid, or a gas, and the speed of the wave depends on the material properties of the medium through which it is traveling. However, light is not a mechanical wave; it can travel through a vacuum such as the empty parts of outer space.

**When you have a bow wave, the wave source speed and the wave speed?**  
Answer and Explanation: Bow refers to the V shape formed by the overlap of waves formed at the edges when the source moves faster than the wave it produces. An object traveling across a liquid surface produces a V shape disturbance when it travels at speed larger than the wave speed.

**What is the difference between waves and vibrations?** What is the difference between a wave and a vibration? A vibration is a repeated motion of a particle when displaced from its resting position. On the other hand, a wave is a disturbance or a vibration that travels and carries energy from one point to another. Vibrations and oscillations are the sources of all waves.

**What is vibrations and wave phenomena in physics?** If you take any system and disturb it from a stable equilibrium, the resultant motion will be waves and vibrations. Think of a guitar string—pluck the string, and it vibrates. The sound waves generated make their way to our ears, and we hear the string's sound.

**What does the speed of a wave depend on the \_\_\_\_\_?** Refraction. The speed of a wave depends on the properties of the medium through which it travels. For example, sound travels much faster through water than through air. When a wave

enters at an angle a medium through which its speed would be slower, the wave is bent toward the perpendicular.

**Does the speed of a wave depend only on the medium?** These properties describe the wave, not the material through which the wave is moving. The lesson of the lab activity described above is that wave speed depends upon the medium through which the wave is moving. Only an alteration in the properties of the medium will cause a change in the speed.

**What determines if waves travel slower or faster?** The wave speed,  $v$ , is how fast the wave travels and is determined by the properties of the medium in which the wave is moving. If the medium is uniform (does not change) then the wave speed will be constant. The speed of sound in dry air at 20 °C is 343.5 m/s but this speed can change if the temperature changes.

**Does the medium in which a wave travels move with the wave?** The medium in which a wave travels does not move along with the wave itself. The medium is only a conduit for the transfer of energy the wave transmits from point to point. Electromagnetic waves travel through a vacuum where there is no medium.

**In what direction are the vibrations relative to the direction of wave travel in a longitudinal wave?** Longitudinal waves are waves in which the vibration of the medium is parallel to the direction the wave travels and displacement of the medium is in the same (or opposite) direction of the wave propagation.

**Do waves transfer particles?** Waves transfer energy but not matter. The particles take part in the propagation of wave by transferring the disturbance from one particle to another. Hence, the energy is transferred, but the position of the particles remains unchanged over time.

**What do we call a wiggle in time?** Answer and Explanation: A wiggle in time is called vibrations. A wiggle in space and time is a wave.

**How many factors affect the speed of a wave?** The factors determining the speed of a wave are wavelength, medium, and temperature. The speed of a wave can be calculated by the formula:  $\text{Speed} = \text{Wavelength} \times \text{Frequency}$ .

**What waves move in one direction but medium moves in another?** Transverse waves cause the medium to move perpendicular to the direction of the wave. Longitudinal waves cause the medium to move parallel to the direction of the wave.

**What do waves carry?** A wave carries energy from a source to a point some distance away. A wave is reflected by a barrier. The reflected wave moves away from the barrier at an angle that is equal to the angle with which the incoming wave moved towards the barrier.

**How is a wave different than a pulse?** Answer and Explanation: The main difference between a wave and a pulse is that the wave is considered to be a continuous disturbance caused by an oscillating particle in a medium. On the other hand, the pulse is not continuous and it happens during a very short time.

**Is true or false wave speed determined by medium?** The wave speed,  $v$ , is how fast the wave travels and is determined by the properties of the medium in which the wave is moving. If the medium is uniform (does not change) then the wave speed will be constant.

**Is the speed of a wave determined by the medium through which it travels?** The speed of a wave is dependent upon the properties of the medium through which the wave is moving. An alteration in the properties of the medium will result in a change in the speed at which the wave moves through that medium. The speed of a wave is often calculated as the product of frequency and wavelength.

**Is true or false the speed of the sound depends on the medium in which it is transported?** The speed of sound changes depending on the medium it travels through. Sound moves the fastest through solids because the molecules in a solid are close together, or more dense. Density is how compact the molecules are. Sound travels slower in liquids and slowest in gases.

**Does the speed of a wave does not depend on the medium through which it travels and the amount of energy it carries?** While it is true that the speed of a wave heavily depends on the medium through which it travels, it does not depend on the amount of energy it carries. The speed of a wave is determined by the properties of the medium like its density and elasticity.

**What is the whispering in the jungle on Lost?** Michael told Hurley that the whispers are actually the voices of people who died and were trapped on the island, unable to move on. So what's the connection between the whispers and the Others? It seems likely that the ghosts were trying to warn the survivors that the Others were

coming.

**What does the ending of Lost mean?** The final scene of 'Lost' (ABC) These flashsideways scenes present a purgatory-of-sorts, where these characters come to when they eventually do die whenever that may be. When broken down, it's a beautiful and reassuring depiction of the afterlife.

**Is the book the jungle a true story?** The novel, while containing an abundance of true events, is fictional. Jurgis Rudkus and his family are not real people. Rather, their story is an amalgamation of stories Sinclair was exposed to.

**What is the hidden message of The Jungle Book?** The Jungle Book (1894) is a collection of stories by the English author Rudyard Kipling. ... Another important theme is of law and freedom; the stories are not about animal behavior, still less about the Darwinian struggle for survival, but about human archetypes in animal form.

**What is the story of the lost boy in the jungle?** A boy was lost in the jungle to find an old place while finding an old place he sees a door with a big and heavy lock on it he breaks the lock and goes inside sees a magic book and read that book suddenly a miracle happens so he takes the book and comes back home and becomes a wealthy man.

**What happens at the end of The Jungle?** Finally, however, Jurgis learns about socialism at a rally and finds hope in the message; he lands a job as a porter at a

socialist-run hotel and returns to the family with new hope in the future. The novel ends with a spirit of optimism that Jurgis and his newfound socialist compatriots will transform society's ills.

**How much of The Jungle is real?** “Jungle” is a true story, based on Ghinsberg's memoir of his disastrous 1981 trek, and the real meat of it — pun intended — isn't fantastical: Yossi gets separated and must fight punishing nature and his deteriorating self just to survive.

**How much weight did Daniel Radcliffe lose for The Jungle?** He wanted to feel hungry. It was quite admirable to see him surviving on one hard boiled egg when there was a chef on site and nice food.” Yossi lost 35 pounds during his near-death experience in the jungle. “Jungle” hits theaters and On Demand / Digital HD October 20.

**What is the main message of The Jungle?** The main theme of The Jungle is the evil of capitalism. Every event, especially in the first twenty-seven chapters of the book, is chosen deliberately to portray a particular failure of capitalism, which is, in Sinclair's view, inhuman, destructive, unjust, brutal, and violent.

**What is the main argument of The Jungle?** The Jungle was written to demonstrate the evils of the capitalist system in America. In the novel, Upton Sinclair shows the way the capitalist system exploits the working class, gives absolute power to the wealthy few, and forces individuals to act only out of self-interest, regardless of the suffering of others.

**What does The Jungle teach us?** The ability to be patient is not just about waiting, it's about your attitude when you wait. Keeping your cool when you wait is patience with kids. This is a great value that can be learned from the life of the leopard. Dogs: A dog is a very loyal and faithful animal.

**What is the thing in the jungle in Lost?** The Man in Black/Smoke Monster The smoke monster is established as an antagonist in Lost from the very first episode, "Pilot". The producers' initial plan was for the monster to represent the id, in a manner similar to the "id monster" from the 1956 film Forbidden Planet.

**What does 4,8,15,16,23,42 mean?** For the episode, see Numbers (episode). The numbers 4, 8, 15, 16, 23 and 42 frequently recurred in Lost. Each corresponded with one of the final candidates to replace Jacob as protector of the Island. The numbers also formed the coefficients in an equation that predicted mankind's extinction.

**What was the big secret in Lost?** Explanation: Towards the end of the series, it is revealed that the whispers are in fact spoken by the spirits of the island's deceased individuals who had not yet moved on. This is revealed to Hurley via a vision of Michael (Harold Perrineau), a character who sacrifices himself in the fourth season.

**What is the story of the lost boy in The Jungle?** A boy was lost in the jungle to find an old place while finding an old place he sees a door with a big and heavy lock on it he breaks the lock and goes inside sees a magic book and read that book suddenly a miracle happens so he takes the book and comes back home and becomes a wealthy man.

**What is the moral of the story the lost boy?** Answer: This story conveys a message that children love their parents unconditionally. He doesn't ask his parents

sweets or any such thing because he knows that his parents wouldn't grant thus wish. But when he gets lost, he doesn't care about anything else and just wants his parents back.

**What is the true story of the lost boys?** In 1987, civil war drove an estimated 20,000 young boys from their families and villages in The Republic of South Sudan. Most just six or seven years old, they fled to neighboring Ethiopia to escape persecution and war. It was a journey on foot across more than 1,000 miles of dangerous desert.

pine it preserved.

**What happens to Mowgli at the end of the story?** After being accused of witchcraft and cast out of the village, Mowgli returns to the jungle with Shere Khan's hide and reunites with his wolf family, but it is mentioned that he later becomes married and goes back to the man village.
