## **Zimmer Periarticular Proximal Tibial Locking Plate: A Guide for Surgeons**

### **Introduction**

The Zimmer Periarticular Proximal Tibial Locking Plate (PP-TLP) is a minimally invasive anatomical locking plate designed for the fixation of fractures around the knee joint. It provides optimal stability and versatility for complex periarticular proximal tibial fractures.

### **Question 1: When is the PP-TLP indicated?**

**Answer:** The PP-TLP is indicated for the treatment of complex fractures of the proximal tibia involving the metaphysis or articular surface, including:

- Bicondylar fractures
- Lateral plateau fractures
- Medial plateau fractures
- Tibial spine fractures
- Osteochondral lesions

### **Question 2: What are the key features of the PP-TLP?**

**Answer:** The PP-TLP features:

- Anatomical contouring to match the proximal tibial geometry
- Low-profile design for minimal soft tissue irritation

- Polyaxial locking screws for optimal angular stability
- Variable-angle head screws for adjustable screw path
- Large articular surface for improved fragment reduction

**Question 3: What are the clinical benefits of using the PP-TLP?**

**Answer:** The clinical benefits of using the PP-TLP include:

- Excellent fracture stabilization and restoration of joint function
- Reduced risk of hardware failure and secondary displacement
- Minimized soft tissue damage and scarring
- Shortened surgical time and improved patient outcomes

**Question 4: How is the PP-TLP inserted?**

**Answer:** The PP-TLP is inserted through a minimally invasive anterolateral approach. The plate is positioned over the fracture site and secured with screws. The locking screws are inserted through the plate and locked into the bone, providing rigid fixation.

**Question 5: What are the potential complications associated with the PP-TLP?**

**Answer:** Potential complications associated with the PP-TLP include:

- Deep vein thrombosis or pulmonary embolism
- Infection
- Nerve or blood vessel injury
- Hardware failure
- Non-union or delayed union

These complications are rare, but patients should be informed of their potential risks before surgery.
