**What is the difference between a steam engine and an internal combustion engine?** Whereas steam engines first combust a fuel to heat water—a process that produces the steam that transmits the energy used to power the engine—internal combustion engines convert the heat energy of the fuel into mechanical power directly.

**What are the three types of internal combustion engines?** Answer and Explanation: Internal combustion engines are divided into three types of engines; two strokes, diesel engine and four-stroke petrol.

**Who invented the first engine in the world?** The First Engine The first successful type of engine, the steam engine, was invented by Thomas Savery in 1698. A steam engine uses a boiler to create steam, the resulting heat energy is transformed into mechanical energy.

**Is the Otto engine still used today?** Nikolaus Otto is generally credited with building the first four-stroke internal combustion engine in 1876. In doing so he established the principle still in use today. The Otto cycle engine employs a spark to ignite a mixture of air and – traditionally – gasoline<sup>1</sup> compressed by the piston within the engine cylinder.

**How much horsepower did the first internal combustion engine have?** 1885: The Benz Patent-Motorwagen – often considered to be the first automobile – is built. It was powered by a 0.55 kW (0.74 hp) single-cylinder four-stroke engine.

**What is the difference between SI and CI engines?** SI engines use a spark plug to ignite a fuel-air mixture, while CI engines rely on the heat of compression to ignite the fuel. Additionally, SI engines typically use gasoline and have faster combustion, while CI engines use diesel fuel and have higher thermal efficiency.

**Who is the father of modern engine?** Nikolaus Otto is one such innovator – the father of the modern engine. The youngest of six children, Nikolaus Otto was born on the 14th of June, 1832 – the same year his Father died – in Holzhausen an der Haide, western Germany. He displayed a keen interest in science and technology throughout school.
