Techniques and Procedures for Accident Investigation**

Five Accident Investigation Techniques

- **Five Why Analysis:** Asking "why" five consecutive times to identify the root cause of an accident.
- **5 Whys for Accident Investigation:** Uncovering the underlying causes by repeatedly asking "why."
- **5 Factors of Accident Sequence:** Analyzing human factors, equipment, environment, management, and work processes involved in accidents.
- **Six Methods of Investigation:** Conducting in-depth examinations using surveillance, interviews, document review, physical evidence collection, and witness accounts.
- **Eight Steps in Accident Investigation:** A comprehensive framework for investigating accidents, including scene documentation, data collection, analysis, corrective action planning, and reporting.

Seven Steps of Accident Investigation

- Preparation and Planning
- Data Collection and Documentation
- Cause Analysis and Root Determination
- Corrective Action Planning

- Implementation and Evaluation
- Follow-up and Monitoring
- Documentation and Reporting

Procedures for Investigating an Accident or Incident

1. Preserve the scene.
2. Notify the appropriate authorities.
3. Collect data and evidence.
4. Analyze the data.
5. Determine the cause(s).
6. Develop recommendations for corrective action.
7. Implement corrective actions.
8. Monitor the effectiveness of corrective actions.

Four Major Stages to Accident Investigation

- **Data Collection:** Gathering information from interviews, physical evidence, and documentation.
- **Cause Analysis:** Identifying the factors that contributed to the accident.
- **Corrective Action Planning:** Developing measures to prevent future accidents.
- **Evaluation:** Assessing the effectiveness of corrective actions and making necessary adjustments.

Five Steps of Investigation

- **Initial Notification and Response:** Receiving the report, assessing the situation, and responding accordingly.
- **Scene Investigation:** Documenting the scene, collecting evidence, and interviewing witnesses.
- **Information Gathering:** Conducting interviews, reviewing documentation, and analyzing data.
- **Accident Reconstruction:** Analyzing the evidence to determine the sequence of events leading to the accident.

- **Reporting and Corrective Action:** Documenting the investigation findings and recommending corrective actions to prevent future incidents.
