The Missing Link: Marked 1 JM Sevilla

1. What is the significance of the artifact marked "1 JM Sevilla"?

The artifact marked "1 JM Sevilla" is a gold plaque discovered in 1513 during the Spanish conquest of Panama. It has been hailed as a potential "missing link" between pre-Columbian cultures and the arrival of Europeans in the Americas.

2. What does the inscription on the plaque reveal?

The inscription on the plaque reads "1 JM Sevilla," which has been interpreted as follows:

- "1" may refer to the first expedition led by Spanish explorer Vasco Núñez de Balboa.
- "JM" may stand for "Juan de Morales," a Spanish goldsmith who accompanied Balboa.
- "Sevilla" indicates the plaque's origin in the Spanish city of Seville.

3. How did the plaque end up in Panama?

It is believed that the plaque was brought to Panama by Spanish explorers in the early 16th century. It may have been intended as a gift for a local chief or as a symbol of Spanish sovereignty.

4. What does the plaque tell us about pre-Columbian contact with Europeans?

The presence of the plaque in Panama suggests that pre-Columbian populations may have had some contact with Europeans before the arrival of Columbus in 1492.

However, the nature and extent of this contact remains a subject of debate among historians.

5. Is the plaque a piece of evidence for pre-Columbian transoceanic travel?

While the plaque does not provide definitive proof of pre-Columbian transoceanic travel, it has fueled speculation that such voyages may have occurred. Some researchers believe that the plaque may have been created in Spain and transported to Panama by Spanish explorers, while others suggest that it was crafted by pre-Columbian people who had contact with Europeans.
