Question 2: How did Bosch understand the relationship between the Gospel and culture?

Answer: Bosch emphasized the importance of contextualizing the Gospel message within different cultural contexts. He argued that the Gospel should not be imposed on cultures but should engage with them in a transformative way, respecting their unique values and expressions.

Question 3: What role did liberation theology play in Bosch's mission paradigm?

Answer: Liberation theology was a significant influence on Bosch. He believed that mission should prioritize the liberation of the oppressed and the marginalized. He argued that the Gospel had a transformative power to bring about social justice and equity.

Question 4: How did Bosch view the role of the church in mission?

Answer: Bosch emphasized the importance of the church's role as an agent of transformation. He saw the church as a community of faith called to engage with the world and work towards its renewal. He encouraged churches to adopt a holistic approach to mission, addressing both spiritual and societal needs.

The Social Contract: From Hobbes to Rawls

By David Boucher

The social contract is a philosophical concept that describes the implied agreement between individuals and the state. This agreement legitimizes the state's authority and outlines the rights and obligations of both parties.

Question 1. What is the Hobbesian view of the social contract?

Answer: Thomas Hobbes argued that humans are naturally selfish and competitive. Without a social contract, society would devolve into a "war of all against all." Therefore, individuals enter into a social contract to create a sovereign power that maintains order and protects their lives and property.

Question 2. How does Locke's view of the social contract differ from Hobbes's?

Answer: John Locke believed that humans are rational and capable of self-governance. He argued that the purpose of a social contract is to protect natural rights, such as life, liberty, and property. If the government fails to protect these rights, individuals have the right to rebel.

Question 3. What is the Rousseauian view of the social contract?

Answer: Jean-Jacques Rousseau believed that individuals are naturally good but corrupted by society. He argued that the social contract should create a "general will" that represents the interests of the entire community. Individuals are bound to obey the general will because it is an expression of their own free will.

Question 4. What is the Rawlsian view of the social contract?

Answer: John Rawls proposed a "veil of ignorance" thought experiment, where individuals design a social contract without knowing their own social status. He

argued that the resulting contract would be based on principles of justice and fairness, such as the equal distribution of resources and the protection of basic liberties.

Question 5. What is the significance of the social contract in political theory?

Answer: The social contract provides a theoretical foundation for understanding the relationship between individuals and the state. It legitimizes political authority, establishes rights and obligations, and outlines the conditions for rebellion. The social contract has influenced political thought and practice for centuries, shaping modern concepts of democracy, constitutionalism, and human rights.
