**How to make a robotic brain?**

**How to make a robot with Arduino?**

**Can a brain be kept alive artificially?** An isolated brain is a brain kept alive in vitro, either by perfusion or by a blood substitute, often an oxygenated solution of various salts, or by submerging the brain in oxygenated artificial cerebrospinal fluid (CSF).

**Can I put my consciousness into a robot?** The science of the brain and of consciousness suggests that, in theory, we can transfer consciousness to a machine. This is also known as 'mind uploading'. However, conventional ideas on mind uploading rely on scanning our postmortem brains, where 'we' are not the ones who live on.

**Can Arduino have AI?** Arduino can be used for artificial intelligence by integrating it with sensors and motors to monitor and control devices and appliances remotely.

**How to build a robot for beginners?**

**How to make a human robot?**

**Is it possible to make an artificial brain?** Human brains use water and dissolved salt particles called ions as their medium, while advanced computer systems rely on conventional solid materials for the same function. With the recent breakthrough, it has become clear that computers can be developed that will work like a human

brain.

### **Can you transplant a brain into a robot?**

**What are robot brains made of?** The robot's biological brain is made up of cultured neurons which are placed onto a multi electrode array (MEA). The MEA is a dish with approximately 60 electrodes which pick up the electrical signals generated by the cells. This is then used to drive the movement of the robot.

**Is it possible to program a human brain?** While some researchers believe editing human brains to be physically possible in theory, for example by performing neurosurgery with nanobots, it would require particularly advanced technology. Editing an uploaded mind would be much easier, as long as the exact edits to be made are known.

### **The First European Description of Japan: 1585**

#### **A Critical English Language Edition of Striking Contrasts in the Customs of Europe**

##### **Introduction**

In 1585, Portuguese Jesuit missionary Luís Fróis penned the "Tratado em Que se Contém Muito Sunta e Boa Doutrina Acerca dos Costumes e Geres desta Terra do Japão", the first European account of Japan.
