

Agriculture food natural resources afnr

Download Complete File

What resources are used in agriculture? Farmers fully understand in order to yield a successful crop we need our vast natural resources. The sun, air, water and soil are just some that we rely on. For thousands of years, farmers have fed the world while protecting these resources and operating sustainable family businesses.

What are the natural resources in Florida? Resources mined in Florida include phosphate, limestone, dolomite, shell, heavy minerals, fuller's earth, peat, clay, gravel and sand.

What are the different types of resources in farming? Resources are characterized as renewable or nonrenewable; a renewable resource can replenish itself at the rate it is used, while a nonrenewable resource has a limited supply. Renewable resources include timber, wind, and solar while nonrenewable resources include coal and natural gas.

What are the main agricultural resources in India? India is the world's largest producer of milk, pulses and jute, and ranks as the second largest producer of rice, wheat, sugarcane, groundnut, vegetables, fruit and cotton.

What are all of the natural resources? Natural resources are materials from the Earth that are used to support life and meet people's needs. Any natural substance that humans use can be considered a natural resource. Oil, coal, natural gas, metals, stone and sand are natural resources. Other natural resources are air, sunlight, soil and water.

What are 3 renewable resources in Florida? Types of renewable energy include solar, wind, bioenergy, geothermal, hydropower, current and wave energy and hydrogen energy.

Is oil a natural resource in Florida? Florida's nonrenewable natural resources include phosphate, oil, limestone, and silica. Phosphates are minerals that can be mined, ground, and used in fertilizers. Petroleum oil is used as fuel and to produce many other materials, including plastics.

What are the agricultural resources of the Philippines? Irrigated farm areas mainly grow rice and sugarcane whereas rainfed areas are planted with coconut, corn and cassava. The Philippines' major agricultural products include rice, coconuts, corn, sugarcane, bananas, pineapples, and mangoes.

What are the agricultural resources of Nigeria? Crops grown in Nigeria include beans, rice, sesame, cashew nuts, cassava, cocoa beans, groundnuts, gum arabic, kolanut, cocoa, maize (corn), melon, millet, palm kernels, palm oil, plantains, rice, rubber, sorghum, soybeans, bananas, and yams.
