**Does Chevy still make Cavalier?** The new 2023 Chevrolet Cavalier® has evolved to rise your expectations to the top. Its power has increased thanks to its new turbocharged engine with 161 HP on all versions.

**What happened to the Chevy Cavalier?** The station wagon was sold until 1994. The 1995-2005 Cavalier received a Poor rating in the IIHS' frontal off-set crash test. Meaning, head, neck and leg injury risk were extremely high. In 2005 Chevrolet Cavalier was replaced by the Cobalt in the United States and the Chevrolet Optra in Canada & Mexico.

**Is a Chevy Cavalier a GM car?** The Cavalier was among the inaugural vehicles of the GM J platform. One of the first "world cars" of General Motors, the J platform was developed for use by each North American GM division (with the exception of GMC), alongside international models for Opel, Vauxhall, and Holden.

**Where is the Chevy Cavalier made?** The Cavalier, like 60 percent of the GM models sold in Mexico, is made in China. The General filed a trademark for the Chevy Cavalier in the U.S. back in summer of 2022, though since then, no further steps toward resuscitating the nameplate have been taken publicly.

**Is Chevrolet sold in China?** GM's U.S.-based brands such as Buick and Chevrolet have seen sales drop more than its joint venture sales with SAIC Motor , Wuling Motors and others. The joint venture models accounted for about 60% of its 2.1 million vehicles sold last year in China.

**What replaced the Cavalier?** It's been over 15 years since Chevrolet discontinued the production of the unremarkable but high-value Cavalier compact car in North America. Succeeded by the Cobalt and later the Cruze in the USA, the Cavalier

nameplate lives on in other regions such as Mexico.

**Why is it called Cavalier?** Did you know? The adjective cavalier comes from a noun referring to a gentleman or knight who is trained in arms and horsemanship.

**How many Chevy Cavaliers were sold?** General Motors sold better than 6 million Chevrolet Cavaliers from the 1982 through the 2005 model years, and its J-Body siblings — not just from the other American GM divisions but also from Opel, Isuzu, Vauxhall, Daewoo, Toyota and Holden — made this car one of the worldwide best-sellers of the late 20th century.

**What car is Chevy not making anymore?** Chevrolet Malibu Rumors of its demise have been around for a while, but now it's official. GM will end production of the Chevy Malibu in November of 2024. The assembly line in Kansas will be retooled to build the replacement for the Chevy Bolt.

**What car did Chevy stop making?** With the Malibu's demise, General Motors' mainstream Chevrolet brand will sell only trucks, SUVs, and the Corvette, a two-seat sports car, in the United States.

**Is the Chevy Cobalt the same as a Chevy Cavalier?** The Cobalt replaced both the Cavalier and the Toyota-based Geo/Chevrolet Prizm as Chevrolet's compact car. The Cobalt was available as both a coupe and sedan, as well as a sport compact version dubbed the Cobalt SS. Like the Chevrolet HHR and the Saturn ION, it was based on the GM Delta platform.

**Is Chevrolet replacing Holden?** Holden has been replaced by GM Specialty Vehicles (GMSV), which imports the Chevrolet Silverado and the Chevrolet Corvette.

**Why was the Chevy Cobalt discontinued?** The automaker never really wanted to build the compact sedan, and it showed. Critics and car buyers alike reacted with little enthusiasm for the vehicle. "They couldn't stop making them," said Kelley Blue Book analyst Karl Brauer, "but they stopped caring about doing a good job on them."
