LETTER OF MOTIVATION ERASMUS SCHOLARSHIP

**Question 1: What is the law of demand? Answer:** The law of demand states that, all other factors remaining constant, as the price of a good or service increases, the quantity demanded will decrease. Conversely, as the price decreases, the quantity demanded will increase.

**Question 2: Explain the concept of price elasticity of demand. Answer:** Price elasticity of demand measures the responsiveness of quantity demanded to changes in price. A good with a high elasticity is considered elastic, meaning consumers are sensitive to price changes and will adjust their consumption accordingly. In contrast, a good with a low elasticity is considered inelastic, indicating consumers are less responsive to price changes.

**Question 3: What factors determine the shape of a supply curve? Answer:** The shape of a supply curve is influenced by several factors, including the price of inputs, technology, and expectations of future prices. A positive supply curve indicates that as the price of a good or service increases, producers will supply more. In contrast, a negative supply curve indicates that producers will reduce supply as the price increases.

**Question 4: Explain the relationship between consumer surplus and producer surplus. Answer:** Consumer surplus represents the difference between the price consumers are willing to pay for a good or service and the actual price they pay. Producer surplus, on the other hand, is the difference between the price producers receive for their goods or services and the minimum price they are willing to accept. Together, consumer and producer surplus comprise the total surplus in the market.

**Question 5: What is the role of government in a market economy? Answer:** Governments can play various roles in a market economy, including promoting competition, providing public goods, and addressing market failures. Governments may also impose taxes, subsidies, or regulations to influence market outcomes. The extent of government intervention varies depending on the economic ideology and political system of the country.
