### **Time Saver Standards for Building Types: Frequently Asked Questions**

**Q: What is the purpose of Time Saver Standards for Building Types?** **A:** Time Saver Standards (TSS) are architectural reference manuals that provide quick access to essential data on building design, engineering, and construction. They offer standardized information for various building types, enabling architects and engineers to streamline the design process and save time.

**Q: What types of information do TSS include?** **A:** TSS typically include:

- Building area standards
- Space planning criteria
- Structural and mechanical system data
- Cost estimation guidelines
- Material selection recommendations
- Regulatory code summaries

**Q: How can TSS help me save time?** **A:** By providing standardized information, TSS eliminate the need for extensive research and calculations. They offer a starting point for design decisions, allowing architects and engineers to focus on the unique

aspects of each project rather than reinventing the wheel.

**Q: What are the limitations of TSS? A:** While TSS provide valuable information, they are not comprehensive and may not account for all project-specific requirements. Architects and engineers should still exercise professional judgment and consult with specialized consultants as needed. Additionally, TSS may not be updated regularly, so it's important to ensure that the information is current.

**Q: How can I access Time Saver Standards? A:** Time Saver Standards are available in print and digital formats. They can be purchased from publishers such as McGraw-Hill and Scrib'd. Subscribing to online platforms like Scrib'd provides access to a wide range of TSS and other architectural resources.
