### Selbuvotter: Oppskrift Gratis

#### Hva er Selbuvotter?

Selbuvotter er tradisjonelle norske votter med et karakteristisk mønster av snøkrystaller og stjerner. De er laget av tovet ull og er kjent for sin varme og holdbarhet.

#### Hvordan lager jeg Selbuvotter?

For å lage dine egne Selbuvotter, trenger du:

- Ullgarn i to farger (hovedfarge og kontrastfarge)
- Tovingsponcho eller vaskemaskin
- Heklenål eller rundpinne (valgfritt)

#### Gratis oppskrift på Selbuvotter:

1. **Strikking:** Legg opp 56 masker med hovedfargen og strikk 1 cm ribb (1 rett, 1 vrang). Fortsett å strikke i hovedfargen, og følg mønsterdiagrammet for å lage snøkrystall- og stjernemønsteret.
2. **Toving:** Når vottene er ferdig strikket, tover du dem i en tovingssponcho eller bruk vaskemaskinen på ullprogram med høyeste temperatur.
3. **Forming:** Etter toving, klipp opp for- og bakstykket på vottene. Sy sammen sømmene, og sy på tommelfingeren.
4. **Snor:** Hekle eller strikk en snor med kontrastfargen og tre den gjennom kanten på vottene.
5. **Ferdigstilling:** Dine Selbuvotter er nå klare til å holde hendene dine varme!

### **Tips:**

- Bruk et tykt og slitesterkt garn for å sikre at vottene blir varme.
- Tov vottene til ønsket størrelse og passform.
- Pynt vottene med ekstra detaljer som perler eller broderi for en personlig touch.

## **The Motivation to Work by Frederick Herzberg**

Frederick Herzberg, a prominent psychologist in the field of industrial-organizational psychology, developed a two-factor theory of motivation that has had a significant impact on our understanding of employee motivation.

### **Key Question: What are the Two Factors of Herzberg's Theory?**

Herzberg's theory distinguishes between two types of factors that influence employee motivation:

- **Hygiene Factors:** These factors are related to the work environment and prevent dissatisfaction or unhappiness. They include salary, working

conditions, company policies, and relationships with colleagues.

- **Motivators:** These factors are related to the work itself and create satisfaction and motivation. They include achievement, recognition, responsibility, advancement opportunities, and the nature of the work.

### **Q: What are Hygienic Factors and How Do They Affect Motivation?**

Hygiene factors are necessary for employee satisfaction, but their absence does not necessarily lead to motivation. For example, a low salary or poor working conditions can cause dissatisfaction, but improving these factors will not necessarily make employees more motivated.

### **Q: What are Motivators and How Do They Create Motivation?**

Motivators are the key to employee motivation. When these factors are present, employees are more likely to be satisfied with their work, perform better, and be motivated to go above and beyond. For example, an employee who receives recognition for their accomplishments or has the opportunity to take on new challenges is more likely to be motivated and engaged in their work.

### **Q: How Can Herzberg's Theory Be Applied to the Workplace?**

To apply Herzberg's theory in the workplace, managers should focus on creating a work environment that addresses hygiene factors and provides opportunities for motivators. This can be done by:

- Establishing fair compensation and benefits
- Providing a safe and comfortable work environment
- Promoting a culture of respect and collaboration
- Offering opportunities for professional development and growth
- Recognizing and rewarding employee achievements

### **Q: What are the Limitations of Herzberg's Theory?**

While Herzberg's theory has been influential, it has also faced criticism. One limitation is that it is based on a study of a small group of engineers and may not generalize to other employee groups. Additionally, the theory does not account for

individual differences in motivation.
