Can diesels go longer without oil change? As a general rule of thumb, light-use trucks can drive longer — up to as much as 10,000 miles — without needing an oil change. Diesel trucks that idle more, log fewer highway miles, and often tow large loads may need an oil change every three months — or as few as 3,000 miles.

How often should you change oil in a diesel pickup? Light duty commercial vehicles should have their oil changed every 5,000 miles or so. Heavy duty diesel trucks should have their oil changed every 25,000 miles at least. Changing your fleet's oil every 16,000 miles can make sure that there are no performance dips over time.

How often should the lubricating oil of a diesel engine be changed? Our experts generally advise customers to perform a diesel oil change every 5,000 to 7,500 miles.

Do diesel engines need more frequent oil changes? While many would suggest getting your diesel oil changed every 6 months, 400 work hours, or 5,000-7,000

miles, the recommended service interval of your diesel engine depends on how you drive.
