The Reflective Practitioner: A Deeper Understanding

Who is Donald A. Schön? Donald A. Schön was an American philosopher and educational theorist known for developing the concept of the "reflective practitioner." He believed that professionals could improve their practice by critically reflecting on their experiences and learning from them.

What is the Reflective Practitioner Model? Schön's model of the reflective practitioner consists of two types of reflection: reflection-in-action and reflection-on-action. Reflection-in-action occurs during a situation when the practitioner is confronted with a problem or unexpected event.
