

6th grade earth science atmosphere answer key

[Download Complete File](#)

What is the Atmosphere? Q&A**

What is the atmosphere?

- The atmosphere is the layer of gases that surrounds the Earth.

What is the Earth's atmosphere?

- A mixture of gases, including nitrogen, oxygen, argon, and carbon dioxide.

What are the layers of the Earth's atmosphere?

- There are 7 layers: troposphere, stratosphere, mesosphere, thermosphere, exosphere, ionosphere, and magnetosphere.

What are the 4 layers of the atmosphere?

- Troposphere, stratosphere, mesosphere, and thermosphere.

What are the 5 layers of the atmosphere and their functions?

- **Troposphere:** Contains weather and life;
- **Stratosphere:** Protects from harmful UV radiation;
- **Mesosphere:** Absorbs meteors;
- **Thermosphere:** Regulates Earth's temperature;
- **Exosphere:** Outermost layer, composed mostly of hydrogen.

What is air made of?

- Composed of nitrogen (78%), oxygen (21%), argon (0.9%), and trace amounts of other gases.

How much oxygen is in the air?

- 21%

Which two gases make up most of the atmosphere?

- Nitrogen and oxygen

Which layer contains all the weather?

- Troposphere

Which layer is the hottest?

- Thermosphere

Which layer is the coldest?

- Mesosphere

Which layer is closest to Earth?

- Troposphere

How many zones are there in the atmosphere?

- 7

What is the 5th layer of the atmosphere?

- Thermosphere

Which layer of the ozone is found?

- Stratosphere

What is the atmosphere 6th grade science?

- The layer of gases surrounding the Earth.

What are the 5 importance of the atmosphere?

- Protects from radiation;
- Regulates temperature;
- Contains oxygen for life;
- Provides weather patterns;
- Shield from impacts.

What is an atmosphere 5th grade?

- A layer of gases that surrounds a planet or other celestial object.

What are 5 things in the atmosphere?

- Nitrogen, oxygen, argon, carbon dioxide, water vapor.

What are 4 things you can measure in the atmosphere?

- Temperature, pressure, humidity, wind speed.

Why is an atmosphere?

- To protect the planet's surface from harmful radiation and temperature extremes.

What is the atmosphere made of?

- A mixture of gases, predominantly nitrogen and oxygen.

Which two gases make up most of the atmosphere?

- Nitrogen and oxygen

What is atmosphere best answer?

- A protective layer of gases surrounding a celestial body.
