Approximately 83.83% of the company's stock is owned by Institutional Investors, 6.95% is owned by Insiders and 9.22% is owned by Public Companies and Individual Investors.

What caused General Motors downfall? General Motors failed due to multiple reasons. Bad sales and low stock prices were only a few of them. Most people say GM lost its way because: It made cars people didn't want — back in the day, owning a Chevrolet, a Cadillac, or even a Hummer was a big deal.

Is General Motors still successful? Even so, GM has successfully adapted and emerged as the largest automotive manufacturer in the U.S. in 2022 and positively impacted the American economy, both nationwide and in the local communities of our 120 facilities.

When did Alfred Sloan become CEO of GM? Sloan was elected President of General Motors in 1923, succeeding Pierre S. du Pont, who said of him on that occasion: "The greater part of the successful development of the Corporation's operations and the building of a strong manufacturing and sales organization is due to Mr. Sloan.

Who invented planned obsolescence? The origin of the phrase planned obsolescence goes back at least as far as 1932 with Bernard London's pamphlet Ending the Depression Through Planned Obsolescence. The essence of London's plan would have the government impose a legal obsolescence on personal-use items, to stimulate and perpetuate purchasing.

What is the GM ladder of success? He also established a pricing structure in which (from lowest to highest priced) Chevrolet, Pontiac, Oldsmobile, Buick and Cadillac, referred to as the ladder of success, did not compete with each other, and buyers could be kept in the GM "family" as their buying power and preferences changed as they aged.
