South-Western Federal Taxation 2013 Solution Manual: Unlocking Tax Complexities

The intricate world of taxation can be daunting, but the South-Western Federal Taxation 2013 Solution Manual provides a comprehensive guide to understanding and navigating the complexities of federal tax law. This invaluable resource offers detailed answers to challenging questions, empowering students to master the subject and excel in their coursework.

1. Identifying Taxable Income

Question: Determine the taxable income of an individual with the following information: Salary: \$50,000; Interest income: \$10,000; Dividends: \$5,000; Rental income: \$15,000; Mortgage interest deduction: \$10,000; Charitable contributions: \$2,000.

Answer: Taxable income = Salary + Interest income + Dividends + Rental income - Mortgage interest deduction - Charitable contributions = \$50,000 + \$10,000 + \$5,000 + \$15,000 - \$10,000 - \$2,000 = **\$73,000**

2. Deducting Business Expenses

Question: Explain the requirements for deducting business expenses under Internal Revenue Code Section 162.

Answer: Business expenses must meet the following criteria to be deductible:

- Ordinary and necessary for the conduct of the business

- Related to the active conduct of the business
- Not personal in nature

3. Depreciation and Cost Recovery

Question: Calculate the depreciation deduction for a building purchased for \$200,000 with a 25-year useful life and no salvage value using the straight-line method.

Answer: Depreciation deduction = Cost of building / Useful life = \$200,000 / 25 years = **\$8,000**

4. Capital Gains and Losses

Question: Determine the amount of recognized gain or loss on the sale of a stock held for more than one year that was purchased for \$10,000 and sold for \$15,000.

Answer: For assets held for more than one year, only 50% of the capital gain or loss is recognized. Recognized gain = (Selling price - Cost basis) x 50% = (\$15,000 - \$10,000) x 50% = **\$2,500 recognized capital gain**

5. Tax Credits and Deductions

Question: Explain the impact of the Earned Income Tax Credit (EITC) on tax liability.

Answer: The EITC is a refundable tax credit available to low- and moderate-income taxpayers. It provides a direct reduction in tax liability, potentially eliminating it altogether. The EITC is particularly valuable for taxpayers with qualifying children.

Sensación y Percepción: La octava edición de Goldstein

¿Qué es la sensación y la percepción? Según Goldstein, la sensación es el proceso básico de responder a estímulos ambientales, mientras que la percepción es la interpretación y organización de estos estímulos para crear una experiencia significativa. La sensación implica la activación de los receptores sensoriales, mientras que la percepción integra esta información con el conocimiento y las experiencias pasadas.

¿Cómo se relaciona la sensación y la percepción con el cerebro? Goldstein destaca el papel crucial del cerebro en la percepción. Los receptores sensoriales

envían información al cerebro, donde se procesa y organiza en áreas específicas. Estas áreas están conectadas a otras partes del cerebro, lo que permite la integración de la información sensorial con los conocimientos y experiencias previas.

¿Cuáles son los diferentes tipos de sensación? Goldstein identifica cinco tipos principales de sensación:

- **Somestesia:** sensaciones corporales como el tacto, la temperatura y el dolor.
- **Propiocepción:** conciencia de la posición y el movimiento del cuerpo.
- **Vista:** sensibilidad a la luz.
- **Audición:** sensibilidad al sonido.
- **Olfato:** sensibilidad al olor.

¿Cómo afecta la percepción a nuestro comportamiento? La percepción influye significativamente en nuestro comportamiento al guiar nuestras acciones y reacciones. Nuestras percepciones de los demás, del entorno y de nosotros mismos influyen en nuestras decisiones, emociones y relaciones.

¿Cómo se puede mejorar la sensación y la percepción? Existen varias formas de mejorar la sensación y la percepción, como:

- **Entrenamiento sensorial:** ejercicios que mejoran la capacidad de detectar y discriminar estímulos sensoriales.
- **Entrenamiento perceptual:** actividades que mejoran la organización e interpretación de la información sensorial.
- **Experiencias multisensoriales:** interacciones que involucran diferentes sentidos para promover la integración sensorial.
