Download Complete File

Is the Airbus AS9100 certified? Quality Certifications Aerospace Standard (AS) 9100 D is the cornerstone of Airbus Helicopters Inc.'s Quality Management System. The company's primary facilities in Grand Prairie, Texas and Columbus, Mississippi are certified by CMA Quality International to AS9100 standards.

What are the flammability requirements for Airbus? The average burn length may not exceed 152 mm (6 in.) and the average flame time after removal of the flame source may not exceed 15 seconds. Drippings from the test specimen may not continue to flame for more than an average of three seconds after falling.

What is the quality policy of Airbus? We provide quality and on-time products and services with no compromise on safety - in the air and on the ground. Process We respect & continually improve our processes, rules and standards going beyond regulatory requirements. We alert or act on any event and/or hazard(s) that may affect aviation safety or quality.

How many suppliers does Airbus have? We work with more than 12,000 suppliers worldwide, who provide products and services for flying and non-flying parts.

Is AS9100 same as ISO 9001? AS9100 takes all of the requirements of ISO 9001 and adds to them to make them more applicable to the unique requirements of the aerospace and defense industries.

Who needs AS9100 certification? Because AS9100 is an industry-specific quality management system standard, it's mainly used by companies that provide products and services for the defense, space and aviation industries.

What is the ISO standard for flammability? Scope: The flammability test is used to determine the relative rate of burning of self-supporting plastics.

What is a Category 4 flammability? Category 4 shall include liquids having flashpoints above 140 °F (60 °C) and at or below 199.4 °F (93 °C).

What is class A flammability? Class A fire retardants have a flame spread rating of between zero and 25. These materials are effective against severe fire exposure. Class B fire retardants have a flame spread rating of between 26 and 75. These materials are effective against moderate fire exposure.

Is Boeing AS9100 certified? Boeing, as well as other major aerospace manufacturers, flow down AS9100 certification and compliance to its suppliers in order to enable effective and efficient processes that meet multiple customer, statutory and business requirements.

How do you find out if a company is AS9100 certified? To find out if a company is AS 9100 certified, you can search online databases such as the International Aerospace Quality Group (IAQG) database or the National Aerospace and Defense Contractors Accreditation Program (NADCAP) database.

Is SpaceX AS9100 certified? NSF upheld SpaceX's AS9100 certification even after the DOD report was made public. NSF also issued the ISO 9001 cert to L3 EOTech, which was found to have intentionally shipped defective gun sights to military and police personnel.

Who certifies Airbus? Cologne/Toulouse, 19th July 2024 – The Airbus A321XLR powered by CFM LEAP-1A engines has received its Type Certification from the European Union Aviation Safety Agency (EASA), preparing the way for the entry-into-service of the new aircraft at the end of the summer.
